DIPLOMA COURSES IN ENGINEERING / TECHNOLOGY (SEMESTER SYSTEM)

#### (Implemented from 2020 - 2021)

#### N – SCHEME

## <u>REGULATIONS</u>\*

\*Applicable to the Diploma Courses other than Diploma in Hotel Management & Catering Technology.

#### 1. Description of the Course:

#### a. Full Time (3 years)

The Course for the Full Time Diploma in Engineering shall extend over a period of three academic years, consisting of 6 semesters\* and the First Year is common to all Engineering Branches.

### b. Sandwich (3<sup>1</sup>/<sub>2</sub> years)

The Course for the Sandwich Diploma in Engineering shall extend over a period of three and half academic years, consisting of 7 semesters\* and the First Year is common to all Engineering Branches. The subjects of three years full time diploma course being regrouped for academic convenience.

During 4<sup>th</sup> and/or during 7<sup>th</sup> semester the students undergo industrial training for six months / one year. Industrial training examination will be conducted after completion of every 6 months of industrial training.

#### c. Part Time (4 years)

The course for the Part Time Diploma in Engineering shall extend over a period of 4 academic years containing of 8 semesters\*, the subjects of 3 year full time diploma courses being regrouped for academic convenience.

# \* Each Semester will have 16 weeks duration of study with 35 hrs. / Week for Regular Diploma Courses and 18 hrs. / Week for Part-Time Diploma Courses.

The Curriculum for all the 6 Semesters of Diploma courses (Engineering & Special Diploma Courses viz. Textile Technology, Leather Technology, Printing Technology,

Chemical Technology etc.) have been revised and revised curriculum is applicable for the candidates admitted from 2020 – 2021 academic year onwards.

## 2. Condition for Admission:

Condition for admission to the Diploma courses shall be required to have passed in The S.S.L.C Examination of the Board of Secondary Education, Tamil Nadu.

(Or)

The Anglo Indian High School Examination with eligibility for Higher Secondary Course in Tamil Nadu.

(Or)

The Matriculation Examination of Tamil Nadu.

(Or)

Any other Examinations recognized as equivalent to the above by the Board of Secondary Education, Tamil Nadu.

Note: In addition, at the time of admission the candidate will have to satisfy certain minimum requirements, which may be prescribed from time to time.

# 3. Admission to Second year (Lateral Entry):

A pass in HSC (academic) or (vocational) courses mentioned in the Higher Secondary Schools in Tamil Nadu affiliated to the Tamil Nadu Higher Secondary Board with eligibility for University Courses of study or equivalent examination & Should have studied the following subjects.

A pass in 2 Years ITI with appropriate Trade or Equivalent examination.

		H.Sc Academic	H.Sc Vo	Industrial	
SI.	Courses		Subjects	Studied	Training
No	Courses	Subjects Studied	Related	Vocational	Institutes
			subjects	subjects	Courses
1.	All the Regular and Sandwich Diploma Courses	Physics and Chemistry as compulsory along with Mathematics / Biology	Maths / Physics / Chemistry	Related Vocational Subjects Theory& Practical	2 years course to be passed with appropriate Trade
2.	Diploma Course in Commercial	English & Accountancy	English & Accountancy,	Accountancy & Auditing,	-
	Practice	English & Elements of	English & Elements of	Banking,	
		Economics	Economics,	Business Management,	
		English & Elements of Commerce	English & Management Principles & Techniques,	Co-operative Management,	
			English & Typewriting	International Trade,	
				Marketing & Salesmanship,	
				Insurance & Material Management,	
				Office Secretaryship.	

- For the Diploma Courses related with Engineering/Technology, the related / equivalent subjects prescribed along with Practicals may also be taken for arriving the eligibility.
- Branch will be allotted according to merit through counseling by the respective Principal as per communal reservation.
- For admission to the Textile Technology, Leather Technology, Printing Technology, Chemical Technology and Commercial Practice Diploma courses the candidates studied the related subjects will be given first preference.
- Candidates who have studied Commerce Subjects are not eligible for Engineering Diploma Courses.

# 4. Age Limit: No Age limit.

# 5. Medium of Instruction: English

# 6. Eligibility for the Award of Diploma:

No candidate shall be eligible for the Diploma unless he/she has undergone the prescribed course of study for a period of not less than 3 academic years in any institution affiliated to the State Board of Technical Education and Training, Tamil Nadu, when joined in First Year and two years if joined under Lateral Entry scheme in the second year and passed the prescribed examination.

The minimum and maximum period for completion of Diploma Courses are as given below:

Diploma Course	Minimum Period	Maximum Period
Full Time	3 Years	6 Years
Full Time	2 Years	5 Years
(Lateral Entry)		
Sandwich	31/2 Years	61/2 Years
Part Time	4 Years	7 Years

This will come into effect from N Scheme onwards i.e. from the academic year 2020-2021.

### 7. Subjects of Study and Curriculum outline:

The subjects of study shall be in accordance with the syllabus prescribed from time to time, both in theory and practical subjects.

The curriculum outline is given in Annexure – I.

### 8. Examinations:

Board Examinations in all subjects of all the semesters under the scheme of examinations will be conducted at the end of each semester.

The internal assessment marks for all the subjects will be awarded on the basis of continuous internal assessment earned during the semester concerned. For each subject 25 marks are allotted for internal assessment. Board Examinations are conducted for 100 marks and reduced to 75.

The total marks for result are 75 + 25 = 100 Marks.

#### 9. Continuous Internal Assessment:

#### A. For Theory Subjects:

The Internal Assessment marks for a total of 25 marks, which are to be distributed as follows:

### i) Subject Attendance

(Award of marks for subject attendance to each subject Theory/Practical will be as per the range given below)

80%	-	83%	1 Mark
84%	-	87%	2 Marks
88%	-	91%	3 Marks
92%	-	95%	4 Marks
96%	-	100%	5 Marks

#### <u>ii) Test #</u>

#### 10 Marks

2 Tests each of 2 hours duration for a total of 50 marks are to be conducted. Average of the these two test marks will be taken and the marks to be reduced to: 05 Marks

The Test – III is to be the Model Examination covering all the five units and the marks obtained will be reduced to :

05 Marks

TEST	UNITS	UNITS WHEN TO CONDUCT		DURATION
Test I	Unit – I & II	End of 6 <sup>th</sup> week	50	2 Hrs
Test II	Unit – III & IV	End of 12 <sup>th</sup> week	50	2 Hrs
Test III	<b>Model Examination:</b> Covering all the 5 Units. (Board Examinations-question paper-pattern).	End of 16 <sup>th</sup> week	100	3 Hrs

# From the Academic Year 2020 – 2021 onwards.

Question Paper Pattern for the Test - I and Test – II is as follows. The tests should be conducted by proper schedule. Retest marks should not be considered for internal assessment.

## 5 Marks

#### Without Choice:

Part A Type questions:
Part B Type questions:
Part C Type questions:

6 Questions × 1 mark06 marks7 Questions × 2 marks14 marks2 Questions × 15 marks30 marksTotal50 marks

#### <u>iii) Assignment</u>

#### 5 Marks

For each subject Three Assignments are to be given each for 20 marks and the average marks scored should be reduced for 5 marks.

#### iv) Seminar Presentation

#### 5 Marks

The students have to select the topics either from their subjects or general subjects which will help to improve their grasping capacity as well as their capacity to express the subject in hand. The students will be allowed to prepare the material for the given topic using the library hour and they will be permitted to present seminar (For First and Second Year, the students will be permitted to present the seminar as a group not exceeding six members and each member of the group should participate in the presentation. For the Third Year, the students should present the seminar individually.) The seminar presentation is mandatory for all theory subjects and carries 5 marks for each theory subject. The respective subject faculty may suggest topics to the students and will evaluate the submitted materials and seminar presentation. (2 ½ marks for the material submitted in writing and 2 ½ marks for the seminar presentation). For each subject minimum of two seminars are to be given and the average marks scored should be reduced to 5 marks.

All Test Papers, Assignment Papers / Notebooks and the seminar presentation written material after getting the signature with date from the students must be kept in safe custody in the department for verification and audit. It should be preserved for one semester after publication of Board Exam results and produced to the flying squad and the inspection team at the time of inspection/verification.

# B. For Practical Subjects:

The Internal Assessment mark for a total of 25 marks which are to be distributed as follows:-

a) Attendance	: 5 Marks		
	(Award of marks same as theory subjects)		
b) Procedure/ observation and tal	bulation/		
Other Practical related Work	: 10 Marks		
c) Record writing	: 10 Marks		
TOTAL	: 25 Marks		

- All the Experiments/Exercises indicated in the syllabus should be completed and the same to be given for final Board examinations.
- The observation note book / manual should be maintained for 10 marks. The observation note book / manual with sketches, circuits, programme, reading and calculation written by the students manually depends upon the practical subject during practical classes should be evaluated properly during the practical class hours with date.
- The Record work for every completed exercise should be submitted in the subsequent practical classes and marks should be awarded for 10 marks for each exercise as per the above allocation.
- At the end of the Semester, the average marks of all the exercises should be calculated for 20 marks (including Observation and Record writing) and the marks awarded for attendance is to be added to arrive at the internal assessment mark for Practical. (20+5=25 marks)
- Only regular students, appearing first time have to submit the duly signed bonafide record note book/file during the Practical Board Examinations.

All the marks awarded for Assignments, Tests, Seminar presentation and Attendance should be entered periodically in the Personal Theory Log Book of the staff, who is handling the theory subject.

The marks awarded for Observation, Record work and Attendance should be entered periodically in the Personal Practical Log Book of the staff, who is handling the practical subject.

# 10. Communication Skill Practical, Computer Application Practical and Physical Education:

The Communication Skill Practical and Computer Application Practical with more emphasis are being introduced in First Year. Much Stress is given to increase the Communication skill and ICT skill of students.

As per the recommendation of MHRD and under Fit India scheme, the Physical education is introduced to encourage students to remain healthy and fit by including physical activities and sports.

# 11. Project Work and Internship:

The students of all the Diploma Courses have to do a Project Work as part of the Curriculum and in partial fulfillment for the award of Diploma by the State Board of Technical Education and Training, Tamil Nadu. In order to encourage students to do worthwhile and innovative projects, every year prizes are awarded for the best three projects i.e. institution wise, region wise and state wise. The Project work must be reviewed twice in the same semester. The project work is approved during the V semester by the properly constituted committee with guidelines.

# a) Internal assessment mark for Project Work & Internship:

Project Review I	 10 marks
Project Review II	 10 marks
Attendance	 05 marks (Award of marks same as
	theory subject pattern)
Total	 25 marks

Proper record should be maintained for the two Project Reviews and preserved for one semester after the publication of Board Exams results. It should be produced to the flying squad and the inspection team at the time of inspection/verification.

# b) Allocation of Marks for Project Work & Internship in Board Examinations:

Total	100* marks
Internship Report	20 marks
Viva Voce	30 marks
Report	25 marks
Demonstration/Presentation	25 marks

\*Examination will be conducted for 100 marks and will be converted to 75 marks.

#### c) Internship Report:

The internship training for a period of two weeks shall be undergone by every candidate at the end of IV / V semester during vacation. The certificate shall be produced along with the internship report for evaluation. The evaluation of internship training shall be done along with final year "Project Work & Internship" for 20 marks. The internship shall be undertaken in any industry / Government or Private certified agencies which are in social sector / Govt. Skill Centres / Institutions / Schemes.

# A neatly prepared PROJECT REPORT as per the format has to be submitted by individual student during the Project Work & Internship Board examination.

#### 12. Scheme of Examinations:

The Scheme of examinations for subjects is given in Annexure - II.

#### 13. Criteria for Pass:

- No candidate shall be eligible for the award of Diploma unless he/she has undergone the prescribed course of study successfully in an institution approved by AICTE and affiliated to the State Board of Technical Education & Training, Tamil Nadu and pass all the subjects prescribed in the curriculum.
- 2. A candidate shall be declared to have passed the examination in a subject if he/she secures not less than 40% in theory subjects and 50% in practical subjects out of the total prescribed maximum marks including both the Internal Assessment and the Board Examinations marks put together, subject to the condition that he/she secures at least a minimum of 40 marks out of 100 marks in the Board Theory Examinations and a minimum of 50 marks out of 100 marks in the Board Practical Examinations.

#### 14. Classification of successful candidates:

Classification of candidates who will pass out the final examinations from April 2023 onwards (Joined first year in 2020 -2021) will be done as specified below.

#### First Class with Superlative Distinction:

A candidate will be declared to have passed in **First Class with Superlative Distinction** if he/she secures not less than 75% of the marks in all the subjects and passes all the semesters in the first appearance itself and passes all subjects within the stipulated period of study 2 / 3 / 3<sup>1</sup>/<sub>2</sub> / 4 years [Full time(lateral entry)/Full Time/Sandwich/Part Time] without any break in study.

### First Class with Distinction:

A candidate will be declared to have passed in **First Class with Distinction** if he/she secures not less than 75% of the aggregate marks in all the semesters put together and passes all the semesters except the I and II semester in the first appearance itself and passes all subjects within the stipulated period of study  $2/3/3\frac{1}{2}/4$  years [Full time(lateral entry)/Full Time/Sandwich/Part Time] without any break in study.

### First Class:

A candidate will be declared to have passed in **First Class** if he/she secures not less than 60% of the aggregate marks in all the semesters put together and passes all the subjects within the stipulated period of study  $2 / 3 / 3\frac{1}{2} / 4$  years [Full time(lateral entry)/Full Time/Sandwich/Part Time] without any break in study.

### Second Class:

All other successful candidates will be declared to have passed in Second Class.

The above classifications are also applicable for the Sandwich / Part-Time students who pass out Final Examination from October 2023 /April 2024 onwards (both joined First Year in 2020 -2021)

### 15. <u>Duration of a period in the Class Time Table:</u>

The duration of each period of instruction is 1 hour and the total period of instruction hours excluding interval and lunch break in a day should be uniformly maintained as 7 hours corresponding to 7 periods of instruction (Theory & Practical).

\*\*\*\*\*

# **Board Examination-Question Paper Pattern**

Time: 3 Hrs.

Max.Marks:100

- PART A Five questions will be asked covering all units. All questions are to be answered. Each question carries 1 mark.
- PART-B Fifteen questions will be asked covering all the units. Three questions from each unit. Answer any ten questions. Each question carries 2 marks.
- PART-C Five questions will be asked Either or type. One question from every unit. Answer either A or B. Each question carries 15 marks. A and B have subdivisions. (7 + 8)

# The questions are to be numbered from 1 to 25. All the units are to be covered with equal weightage.

PART A	
Definitions and Statements.	5 X 1 = 5 Marks
Question Number 1 to 5	
PART B	
Short answer type questions	10 X 2 = 20 Marks
Question Number 6 to 20	
PART C	
Descriptive answer type questions	5 X15 = 75 Marks
(Either A or B)	$5 \times 15 = 75$ warks
Question number 21 to 25	
TOTAL	100 Marks

Note: Board Examinations will be conducted for 100 Marks and converted to 75 Marks.

II	Bipolar Junction Transistor, Field Effect Transistor and UJT	16
	Feedback, Amplifiers and Oscillators	16
IV	Special Semiconducting Devices(SCR, DIAC AND TRIAC)	14
V	Wave shaping Circuits	13
	Tests and Model Exam	7
	80	

#### **RATIONALE:**

Every Electronics Engineer should have sound knowledge about the components used in Electronics Industry. This is vital in R&D Department for chip level troubleshooting. To meet the industrial needs, diploma holders must be taught about the most fundamental subject, Electronic devices and Circuits . By studying this subject, they will be skilled in handling all types of electronic devices and able to apply the skill in electronics system.

#### **OBJECTIVES:**

On completion of the following units of syllabus contents, the students must be able to:

- Know the importance of Filters
- > Know the construction, working principle and applications of Zener diode
- Know the construction, working principle and applications of Optoelectronic devices
- > Know the biasing methods of Transistors and their applications
- Study the performance of special devices like UJT,FET
- Study the Concept of Feedback, different types of Negative feedback connections
- Know the Types of Transistor amplifiers ,Transistor oscillators and their applications
- Study the performance of Special semiconducting devices like SCR, DIAC, and TRIAC
- Explain the concept of wave shaping circuits, Bistable Multivibrator and Schmitt trigger
- Study the working principle of clippers, clampers, Voltage Multipliers and their applications

# 4040310 ELECTRONIC DEVICES AND CIRCUITS DETAILED SYLLABUS

Contents: Theory

Unit	Name of the topics	Hours
Ι	FILTERS, ZENER DIODES AND OPTO-ELECTRONIC DEVICES	
	1.1: FILTERS	5
	Definition - Types - Capacitor filter - Inductor filter - L section filter - Pi	
	section and RC filter - Comparison and Applications of Filters	
	1.2: ZENER DIODE	5
	Construction, Working principle and Characteristics of Zener Diodes-	Ū
	Zener breakdown-Avalanche breakdown- Zener diode as a Voltage	
	regulator.	
	1.3: OPTO-ELECTRONIC DEVICES	4
	Definition - Types - Symbol, Working , Characteristics and	•
	Applications of LED, 7 Segment LED - Photo diode, Photo	
П	BIPOLAR JUNCTION TRANSISTOR (BJT), FIELD EFFECT	
	TRANSISTOR (FET) AND UNI JUNCTION TRANSISTOR (UJT)	
	2.1: BIPOLAR JUNCTION TRANSISTOR	7
	Transistor biasing: Need for biasing - Types- Fixed bias, Collector to	
	base bias and Self bias (Operation only ,No derivation of circuit elements	
	and parameters)– Define: Stability factor - Operation of Common Emitter	
	Transistor as an Amplifier and as a switch.	
	2.2: FIELD EFFECT TRANSISTOR (FET)	_
	Construction – Working principle–Classification - Drain and Transfer	5
	Characteristics -Applications–Comparison between FET and BJT - FET	
	amplifier (common source amplifier).	
	2.3: UNIJUNCTION TRANSISTOR (UJT)	4
	Construction-Equivalent circuit-Operation-Characteristics-UJT as a	-
	relaxation oscillator	

	FEEDBACK , AMPLIFIERS AND OSCILLATORS 3.1: FEEDBACK	6
	Concept - effects of negative feedback-Types of negative feedback	
	connections - Applications	
	3.2: AMPLIFIERS	6
	Transistor amplifiers - Types - RC coupled amplifier - Working and	
	Frequency response characteristics –Working of Common Collector	
	Amplifier( Emitter follower)	
	3.3 : OSCILLATORS	4
	Transistor oscillators-Conditions for oscillation (Barkhausen criterion)-	
	Classifications- Hartley Oscillator- Colpitts Oscillator - RC Phase shift	
	oscillator	
IV	SPECIAL SEMICONDUCTING DEVICES (SCR, DIAC AND TRIAC)	
	4.1:SCR (SILICON CONTROLLED RECTIFIER)	5
	Symbol – Layered Structure – Transistor analogy - Working–VI	J
	characteristics-Applications - Comparison between SCR and	
	Transistor	5
	4.2: DIAC (Diode for Alternating Current)	
	Symbol - Layered structure - Working - VI characteristics-	4
	Applications	
	4.3: TRIAC (Triode for Alternating Current)	
	Symbol - Layered structure - Working - VI characteristics-	
	Applications	

V	WAVE SHAPING CIRCUITS	
	5.1: CLIPPERSAND CLAMPERS	_
	Construction and working of Positive, Negative and biased Clippers -	5
	Construction and working of Positive and Negative Clamper	
	5.2: Voltage Multipliers	
	Construction and working of Voltage Doubler and Tripler.	3
	5.3 :Multivibrator and Schmitt Trigger	
	Construction – Working – Waveform of Astable and Monostable	
	Multivibrator using Transistors and Schmitt Trigger using Transistors	5

### **Topics and Allocation of Hours**

UNIT	Торіс	Hrs.
I	ELECTRICAL SAFETY & DC CIRCUITS	15
П	AC CIRCUITS AND DC MACHINES	15
	THREE PHASE SUPPLY AND TRANSFORMER	15
IV	AC MACHINES	14
V	SPECIAL MACHINES & DRIVES	14
	Test & Model Exam	
	Total	80

### **RATIONALE:**

The fundamental knowledge about Electrical circuits both AC and DC is essential for all diploma holders. The working principle of DC & AC machines, transformer and special machines is a prerequisite for technicians in their workplace. This subject helps in this way.

#### **OBJECTIVES:**

- Appreciate the safety practices followed in Electrical system.
- Define voltage, current, resistance, resistivity, power, energy and their units.
- State and explain ohm's law and Kirchoff's law and solve simple problems
- Derive equivalent resistance of series and parallel circuits
- State and explain super position theorem, and maximum power transfer theorem and solve problems in theorems
- Explain constructional details of dc machines
- Define the various parameters of single phase supply system
- Derive the impendance, current and voltage of RL, RC & RLC series circuits and also solve the simple problem
- Explain the Explain three phase power measurement by two wattmeter method
- Explain the construction, working and starting methods of single phase, three phase induction motor and Alternator
- Explain the principle and working of different types of induction motor
- Explain the principle and working of transformer
- Compare the use of servo motors and stepper motors in electrical driving system

# 4047320 ELECTRICAL CIRCUITS, MACHINES & DRIVES DETAILED SYLLABUS

# **Contents: Theory**

Unit	Name of the Topics	Hours
I	ELECTRICAL SAFTEY AND DC CIRCUITS	
	Chapter: 1.1: Electrical Safety	
	Importance of earthing - Electric shock - First aid - Precautions - Causes of	3
	accident and their preventive measures	
	Chapter: 1.2: DC Circuits	
	Concept of electrical quantities – Voltage – current – resistance – power –	
	energy – ohm's law – Resistances in series – Resistances in parallel –	12
	series parallel circuits – Kirchhoff's laws - Super position and maximum	
	power transfer theorems – Statement and explanations – Simple problems	
	(Using Series, Parallel, Ohms Law, KCL& KVL for maximum three loops,	
	Super position and maximum power transfer theorem)	
	AC CIRCUITS & DC MACHINES	
	Chapter: 2.1: Single phase AC Circuits	
	AC fundamentals – AC waveform – sinusoidal and non-sinusoidal – period	8
	- frequency - cycle - amplitude - phase - peak value - average value -	
	RMS value (effective value) - form factor - AC Through pure resistor,	
	inductor and Capacitor – Concept of impedance – Capacitors in series and	
	parallel – simple problems. Power in AC circuits – power factor– RL, RC	
	and RLC series – Simple problems (RL,RC (Maximum two branch circuit),	
	RLC Series)	
	Chapter: 2.2: DC Machines	
	DC generators – construction, principle of operation, types and application	7
	- DC motors: - construction, principle of operation, types and application -	
	speed control of DC motor-applications - Necessity of starters: Three point,	
	four point starters	
	THREE PHASE AC CIRCUITS & TRANSFORMER	
	Chapter: 3.1: Three Phase AC Circuits	

-			
		Concept of 3 phase supply - line and phase voltage and current in star	8
		and delta connected circuits – three phase power – Measurement of three	
		phase power by two watt meter method – advantages of three phase over	
		single phase system	
		Chapter: 3.2: Transformers	
		Transformer – Ideal transformer – principle of working – constructional	7
		details - emf equation - turns ratio - core loss - copper loss - efficiency -	
		SC and OC tests – Transformer on No load – Transformer on load – All-	
		day efficiency - Auto transformer - construction and working - applications	
ľ	IV	AC MACHINES	
		Chapter: 4.1: Alternator	4
		3 phase alternator - construction and working - relation between speed	
		and frequency	
		Chapter: 4.2: Three phase Induction motor	6
		Three phase induction motors – Squirrel cage and slip ring Induction	
		motors (construction and working principle only) – methods of starting of 3	
		phase induction motor - DOL and star/delta starter – slip – speed control of	
		3Φ Induction motor	
		Chapter: 4.3: Single phase Induction motor	4
		Single phase induction motor – principle of operation – Types – capacitor	
		start motors – Applications	
-	V	SPECIAL MACHINES & DRIVES	
		Chapter: 5.1: Special Machines	7
		PMDC, Stepper motor- construction and working principle and applications	
		- Servo motor – types: brushless servo motor, permanent magnet servo	
		motor construction and applications	
		Chapter: 5.2: Industrial drives	7
		Types of drives - Group drive, Individual drive, Multi motor drive - Block	
		diagram of Variable frequency drive - Stepper motor drive - Single	
		stepping and half stepping - Servo drives

# TEACHING AND SCHEME OF EXAMINATION

No of weeks per semester: 16 weeks

	Instructions		Examination				
Subject	Hours /	Hours /		Marks			
Gubjeet	Week Semester	Internal Assessment	Board Examinations	Total	Duration		
Manufacturing Technology	5	80	25	100*	100	3 Hrs.	

\* Examinations will be conducted for 100 marks and it will be reduced to 75 marks.

### **Topics and Allocation of Hours**

UNIT	Торіс	Hrs.
I	Lathe	16
П	Drilling machines, Milling machines	16
III	Grinding machine, Shaper	14
IV	Unconventional Machining Processes	14
V	Fundamentals of measurement	13
	Test & Model Exam	
	Total	

### **RATIONALE:**

The Working principle of various machines like Planer, Shaper, Lathe, Drilling machine, Milling Machine is necessary for supervisors and Head's of Manufacturing industries. Usage of machines & Maintenance of Machines are important for plant Engineers.

Knowledge of Unconventional machining processes & measurement methods are necessary for a Mechanical Engineer.

### **OBJECTIVES:**

On completion of the following syllabus contents, the students must be able to

- Explain the working of machine tool Lathe
- Compare various work holding devices
- Explain the working of machine tools drilling machine, Milling machine
- Distinguish various types of milling cutter
- Classify different types of grinders and grinding wheels
- Explain the working of shaper and work holding devices
- Explain the working of various unconventional machines
- Explain the various types of Measuring instruments

# 4047330 - MANUFACTURING TECHNOLOGY DETAILED SYLLABUS

Contents: Theory

Unit	Name of the Topics	Hours
I	Lathe:	
	Introduction - specifications - simple sketch - principal parts - head	
	stock – back geared type – all geared type – feed mechanism - tumbler	
	gear mechanism – quick change gear box – apron mechanism – work	10
	holding device – three jaw chuck – four jaw chuck – centres - faceplate –	16
	mandrel - steady rest - follower rest - machining operations done on	
	lathe – straight turning – step turning - taper turning methods: form tool –	
	tailstock set over method – compound rest method – taper turning	

	attachment – knurling - Thread cutting – Facing – Boring – chamfering –	
	grooving – parting-off – eccentric turning – cutting speed – feed - depth	
	of cut - metal removal rate.	
II	Chapter 2.1 Drilling machines:

DEPARTMENT OF ELECTRONICS (ROBOTICS) / MECHATRONICS ENGINEERING

# **II YEAR**

# **N SCHEME**

# **III SEMESTER**

2020-21 onwards

# ELECTRONIC DEVICES AND CIRCUITS PRACTICAL

(Common with Electronics and Communication Engg)

# ANNEXURE- III STATE BOARD OF TECHNICAL EDUCATION &TRAINING, TAMILNADU DIPLOMA IN ENGINEERING / TECHNOLOGY SYLLABUS N-SCHEME

(To be Implemented for the students admitted from the year 2020 - 2021 onwards)

Course Name : 1040 Electronics and Communication Engineering

Subject code : 4040340

Semester : III

Subject title : ELECTRONIC DEVICES AND CIRCUITS PRACTICAL

#### **TEACHING AND SCHEME OF EXAMINATION:**

No.of weeks/ Semester: 16weeks

	Instruction		Examination			
			Marks			
Subject	Hours Hours /week /semester	Internal Assessment	Board Examination	Total	Duration	
Electronic Devices and Circuits Practical	4	64	25	100*	100	3 Hours

\*Examination will be conducted for 100 marks and it will be reduced to 75 marks.

#### **RATIONALE:**

Every Electronics Engineer should have sound knowledge about the components used in Electronics Industry. This is vital in R&D Department for chip level troubleshooting. To meet the industrial needs, diploma holders must be taught about the most fundamental subject, Electronic devices and Circuits Practical. By doing practical experience in this, they will be skilled in handling all types of electronic circuits and able to apply the skill in electronic systems.

### **OBJECTIVES:**

On completion of the following experiments, the students must be able to

- > Know the Cold Checking of Active and Passive Component
- > Find out the Unknown Resistance value of a Resistor using Colour Coding
- > Find out the Unknown Capacitance value of a Capacitor using Colour Coding

- > Find out the Unknown Inductance value of an Inductor using Colour Coding
- > Understand the concept, working principle and applications of PN Junction diode
- > Understand the concept, working principle and applications of Zener diode
- > Understand the concept, working principle and applications of BJT and FET
- > Understand the concept, working principle and applications of UJT
- > Understand the concept, working principle and applications of SCR
- > Understand the concept, working principle and applications of DIAC and TRIAC
- Understand the concept, working principle and applications of Clippers and Clampers
- Understand the concept, working principle and applications of various types of Negative feedback amplifiers
- > Understand the concept, working principle and applications of Astable Multivibrator

# 4040340 ELECTRONIC DEVICES AND CIRCUITS PRACTICAL

# **DETAILED SYLLABUS**

Contents: Practical

### Exercises

### Note: At least 5 experiments should be done using Soldering board / Bread board

- 1. Construct a circuit to test the forward and reverse bias characteristics of a PN Junction Silicon diode. Find the value of its cut-in voltage
- 2. Construct a circuit to test the forward and reverse bias characteristics of a Zener diode. Find the value of its reverse breakdown voltage
- 3. Construct a Full wave (center tapped) rectifier and test its input and output waveforms with and without Capacitor filter. Find its maximum voltage.
- 4. Construct a Full wave (Bridge) rectifier and test its input and output waveforms with and without Capacitor filter. Find its maximum voltage.
- 5. Construct a Common Emitter Transistor circuit and test its input and output characteristic curves.
- 6. Construct a Common Source Field Effect Transistor circuit and test its drain and transfer characteristic curves.
- 7. Construct a circuit to test the Turning on and Turning off characteristics of SCR and find out the forward break over voltage, the value of Latching and Holding currents.
- 8. Construct a circuit to test the bidirectional characteristics of DIAC and plot its switching characteristics.
- 9. Construct a circuit to test the bidirectional characteristics of TRIAC and plot its switching characteristics.
- 10. Construct a Common emitter amplifier circuit and test its frequency response characteristics with and without Current series feedback introduced in it.
- 11. Construct a circuit to test the switching characteristics of Astable Multivibrator
- 12. Construct a circuit to test the negative resistance Characteristics of UJT.

### RATIONALE

To impart practical knowledge to the diploma students, practical subjects are introduced for every corresponding theory subject. This practical supports the aim and objective of Electrical Machines and Electrical Circuit.

### **OBJECTIVES:**

- Verify Basic Electrical circuits laws & Theorems KCL,KVL super position theorem and power transfer theorem
- Conduct load test on single phase transformer
- Conduct Load test and No Load test on DC generator
- Test the speed control methods of DC and AC motor
- Explore the performance of ELCB, MCB.
- Identify the drive circuit for special motors
- Test the speed control circuit of the Electric motors

# 4047350 ELECTRICAL CIRCUITS, MACHINES AND DRIVES PRACTICAL DETAILED SYLLABUS

Contents: Practical

#### Name of the Topics:

# LIST OF EXPERIMENTS

- 1. Verify Kirchhoff's current Law and Voltage Law
- 2. Test and Verify Maximum Power Transfer theorem
- 3. Test and verify Super position theorem
- 4. Testing of DC starters 3 point and 4 point starter
- 5. Load test on DC shunt motor
- 6. Speed control of DC motor using DIAC and TRIAC
- 7. Testing of AC starters DOL, star Delta starter
- 8. Speed control of AC motor using DIAC and TRIAC
- 9. Testing of relays, contactors, push buttons, MCB & ELCB
- 10.Predetermine the efficiency by open circuit and short circuit test on single phase transformer
- 11. Conduct Load test on Single phase transformer
- 12. Testing of Stepper motor drive

#### **QUESTION PAPER PATTERN**

SI. No	Name of the Activity	Mark Allocation
1.	Circuit Diagram	25
2.	Connection & Procedure	30

### RATIONALE

To impart practical knowledge to the diploma students, practical subjects are introduced for every corresponding theory subject. This practical supports the aim and objective of Manufacturing Technology.

### OBJECTIVES

- Identify the parts of a Lathe and Shaper.
- Identify the Parts of a Milling machine.
- Machine a component using Lathe
- Machine a component using Shaper
- Grind a job to the given specification
- Use a dividing head and indexing plate
- Maintenance of Machines

# 4047360 MANUFACTURING TECHNOLOGY PRACTICAL DETAILED SYLLABUS

Contents: Practical

#### Name of the Topics:

# LIST OF EXPERIMENT

#### I Exercises in Lathe:

- 1. Plain turning
- 2. Step turning
- 3. Step and Taper turning
- 4. Knurling and thread cutting

### **II Exercises in Drilling Machine**

- 5. Drilling and tapping
- 6. Drilling and counter boring
- 7. Drilling and counter sinking

### III Exercises in milling machine

- 8. Plain milling
- 9. Spur gear milling
- 10. Pocket milling

### IV Exercises in cylindrical grinding:

- 11. Shaft grinding
- 12. Plug gauge grinding

### V Exercises in Surface Grinding:

13. Square surface grinding

### VI Exercises in Shaper:

- 14. Shaping round to square
- 15. Shaping a 'V' block

# **QUESTION PAPER PATTERN**

SI. No	Name of the Activity	Mark Allocation		
1	Lathe / Milling	50 Marks

\* Examinations will be conducted for 100 marks and it will be reduced to 75 marks.

### OBJECTIVES

- Understand the types of sections and sectional views
- Understand limits, fits and Tolerances
- Explain the use of threaded fasteners and the types of threads
- Select different types of fits and tolerances for various mating parts
- Draw assembled drawings of various joints and couplings using CAD
- Draw assembled drawings of various types of machine elements using CAD.

# 4047370 CAD PRACTICAL DETAILED SYLLABUS

#### **Contents:** Practical

#### Name of the Topics: Introduction

Sectional views, Limits, fits and tolerances - Keys and surface finish -Screw threads and threaded fasteners - Draw Group commands, Osnap options, Drafting setting and Function keys - Commands Practice - Edit and Modify Group commands, Pedit, Text edit - View groups, Inquiry, Block commands - Hatching, Layer, color and line types - Technical drawing with AutoCAD, Creating - File commands, Plotting, External reference

3D Fundamentals - Predefined 3D objects, Creating surfaces, 3D solid primitives, Working with UCS-3D coordinate system - Solid Rendering

### List of Experiment

#### I Isometric Drawing Ex.Practice

#### II Drawing Ex. Practice (Machine & Assembly drawings in 2D only)

- 1 Sleeve and cotter joint
- 2 Stuffing box
- 3 Knuckle joint
- 4 Plummer block
- 5 Universal coupling
- 6 connecting rod
- 7 Machine vice

#### **III 3D solid modeling practice**

- 8 Geneva Mechanism
- 9 Cast iron block
- 10 Bushed bearing
- 11 Bearing block
- 12 Screw jack

II	A/D, D/A, Special Function ICs and IC Voltage Regulators	13
	Boolean Algebra and Arithmetic operations	10
IV	Combinational and Sequential Logic Circuits	12
V	Memories	12
	Tests and Model Exam	7
	64	

### RATIONALE:

The subject Analog and Digital Electronics holds applications in all branches of engineering instrumentation and Industrial Automation. This will impart in depth knowledge of Number Systems , Logics of Combinational &Sequential circuits and memories.

### **OBJECTIVES:**

On completion of the following units of the syllabus contents, the students must be able to

- > Understand the basics of operational amplifier.
- > Know the op-amp applications.
- > Know the waveform generator and Active filter.
- Know the concept of D/A and A/D converters
- > Know the applications of Special function IC, IC 555 Timer.
- Understand various Number Systems used in Digital Circuits
- > Understand basic Boolean postulates and laws.
- > Understand the De-Morgan's theorem.
- > Understand the concept of Karnaugh Map.
- Learn about Basic logic Gates.
- Study about Boolean techniques.
- > Learn the different digital logic families
- > Learn arithmetic circuits- Adder/Subtractor
- Understand the encoder/decoder & MUX / DEMUX
- > Understand the concept of parity Generator and checker
- Understand various types of flip-flops.
- Understand various types of counters
- Understand various modes of shift registers
- Understand various types of memories

# 4040430 ANALOG AND DIGITAL ELECTRONICS

# **DETAILED SYLLABUS**

# Contents: Theory

Unit	Name of the topics	Hours		
Ι	LINEAR ICS AND OP-AMPS			
	1.1: OPERATIONAL AMPLIFIER	4		
	Ideal Op-Amp – Block diagram and Characteristics – Op-amp parameters			
	CMRR – Slew rate – Concept of Virtual ground			
	1.2: APPLICATIONS OF OP-AMP	4		
	Inverting amplifier – Summing amplifier – Non inverting amplifier – Voltage			
	follower - Comparator – Zero crossing detector – Integrator – Differentiator-			
	waveform generation (Schmitt Trigger only)-RC Low pass Active filter.			
	1.3: OP-AMP SPECIFICATIONS	2		
	OP-amp 741 – Symbol – Pin diagram – Specifications			
П	A/D, D/A ,SPECIAL FUNCTION ICs AND IC VOLTAGE REGULATORS			
	2.1: SAMPLING AND QUANTIZATION	2		
	2.2: A/D CONVERTER			
	Analog to digital conversion using Ramp method – Successive approximation			
	method – Dual slope method – Specifications of A/D converter	3		
	2.3: D/A CONVERTER			
	Basic concepts – Weighted Resistor D/A converter – R-2R Ladder D/A			
	converter – Specifications of DAC IC	2		
	2.4:SPECIAL FUNCTION ICs			
	2.4.1:IC 555 Timer – Pin diagram - Functional Block diagram of IC 555 in			
	Astable and Monostable Multivibrator mode - Schmitt trigger using IC 555	3		
	2.4.2:IC 565-PLL-Pin diagram-Functional Block diagram of IC 565			
	2.4.3:IC 566-VCO-Pin diagram-Functional Block diagram of IC 566			
	2.5.: IC VOLTAGE REGULATORS			
	Positive IC Voltage Regulators: 78XX - Negative IC Voltage Regulators: 79XX	3		
	and General purpose IC Voltage Regulators using LM 723.			

111	<ul> <li>BOOLEAN ALGEBRA AND ARITHMETIC OPERATIONS</li> <li>3.1: NUMBER SYSTEMS</li> <li>Decimal – Binary – Octal – Hexadecimal – BCD – Conversion from one number system to other – Boolean Algebra – Basic laws and Demorgan's</li> </ul>	2

	Test & Model Exam	
	Total	80

### RATIONALE:

Mechanical Engineers must have knowledge about mechanical properties of material, deformation of material subjected to axial load and shear. This will provide adequate knowledge to work as a design engineer.

### **OBJECTIVES:**

On completion of the following syllabus contents, the students must be able to

- Define various mechanical properties of materials.
- Calculate the deformation of materials, which are subjected to axial Load and shear
- Determine the moment of inertias of various section used in the industry.
- Estimate the stresses used in thin cylinder under internal pressure.
- Draw the graphical representation of shear force and bending moment of the Beam subjected to different Load.
- Construct SFD and BMD.
- Calculate the power transmitted by the solid & hollow shafts.
- Distinguish different types of spring and their applications.
- Define Types of Friction

## 4047420 MECHANICS OF MATERIALS DETAILED SYLLABUS

Unit	Name of the Topics	Hours
I	Chapter 1.1 Mechanical properties of materials:	F
	Engineering materials – Ferrous and non-ferrous materials - Definition of	5
	mechanical properties - Alloying elements-effect of alloying element -	
	Fatigue, fatigue strength, creep - temperature creep - cyclic loading and	
	repeated loading – endurance limit.	
	Chapter 1.2 Simple stresses and strains:	10
	Definition - Load, stress and strain - Classification of force systems -	10
	tensile, compressive and shear force systems – Behaviour of mild steel	

	in tension up to rupture – Stress – Strain diagram – limit of proportionality	
	- elastic limit - yield stress - breaking stress - Ultimate stress -	
	percentage of elongation and percentage reduction in area - Hooke's	
	law – Definition – Young's modulus - working stress, factor of safety, load	
	factor, shear stress and shear strain - modulus of rigidity. Linear strain -	
	Deformation due to tension and compressive force – Simple problems in	
	tension, compression and shear force. Definition - Lateral strain -	
	Poisson's ratio - volumetric strain - bulk modulus - volumetric strain of	
	rectangular and circular bars - problems connecting linear, lateral and	
	volumetric deformation - Elastic constants and their relationship -	
	Problems on elastic constants - Definition – Composite bar – Problem in	
	composite bars subjected to tension and compression - Temperature	
	stresses and strains – Simple problems	
II	Chapter 2.1 Geometrical Properties of sections:	
	Definition - center of gravity and centroid - position of centroids of plane	0
	geometrical figures such as rectangle, triangle, circle and trapezium-	8
	problems to determine the centroid of angle, channel, T and I sections	
	only - Definition-centroidal axis-Axis of symmetry. Moment of Inertia -	
	Statement of parallel axis theorem and perpendicular axis theorem.	
	Moment of Inertia of lamina of rectangle, circle, triangle, I and channel	
	sections-Definition- Polar moment of Inertia-radius of gyration -	
	Problems computing moment of inertia and radius of gyration for angle,	
	T, Channel and I sections.	
	Chapter 2.2 Friction:	٨
	Introduction - Definition - Force of friction - Limiting friction - Static	4
	friction - Dynamic friction - Angle of friction - co-efficient of friction - Laws	
	of static and dynamic friction.	
	Chapter 2.3 Bearings:	
	Introduction- Types of bearings. Ball bearing-Angular contact, axial,	3
	deep groove. Roller berating - cylindrical, spherical, tapered, needle	Э
	Applications of bearings - Loads acting on bearing-Selection of bearings-	
l	1	

	Lubrication of bearings- Materials for bearings- Specification of bearings	
III	Chapter 3.1 Lateral Deformation	8
	Classification of beams - definition - shear force and bending moment -	
	sign conventions for shear force and bending moment - types of loadings	
	- relationship between load, force and bending moment at a section -	
	shear force diagram and bending moment diagram of cantilever and	
	simply supported beam subjected to point load and uniformly distributed	
	load (UDL) - determination of maximum bending moment in cantilever	
	beam and simply supported beam when they are subjected to point load	
	and uniformly distributed load.	
	Chapter 3.2 Theory of simple bending	7
	Theory of simple bending - assumptions - neutral axis - bending stress	
	distribution - moment of resistance - bending equation - $M/I = f/y = E/R$ -	
	definition - section modulus - rectangular and circular sections - strength	
	of beam - simple problems involving flexural formula for cantilever and	
	simply supported beam	
IV	Chapter 4.1 Theory of torsion	8
	Assumptions – torsion equation – strength of solid and hollow shafts –	
	power transmitted – Definition – Polar modulus – Torsional rigidity –	
	strength and stiffness of shafts - comparison of hollow and solid shafts in	
	weight and strength considerations - Advantages of hollow shafts over	
	solid shafts –Problems.	
	Chapter 4.2 Springs	
	Types of springs – Laminated and coiled springs and applications –	7
	Types of coiled springs - Difference between open and closely coiled	
	helical springs – closely coiled helical spring subjected to an axial load –	
	problems to determine shear stress, deflection, stiffness and resilience of	
	closed coiled helical springs	
V	Chapter 5.1 Gear Drives	7
	Introduction – Classification of gears – Nomenclature of a gear –	
	Application of spur, Helical and Bevel Gears, Worm and worm wheel,	

rack and pinion - Velocity of a gear drive - merits and demerits of gear	
drive – Problems on simple gear train and power transmitted by gear	
Chapter 5.2 Belt drives	6
Belt drives – Types – Open Belt drive – Cross belt drive – Flat belt drive	
<ul> <li>V belt drives – Problems on power transmitted</li> </ul>

III	Strain and Force Measurements	15
IV	Temperature and Pressure Measurements	15
V	Basic and Advanced Sensors	14
	Test & Model Exam	
	Total	80

### RATIONALE:

Mechatronics Engineers plays a major role in process industries. It needs a brief idea about the basic concepts of instrumentation, various sensors, transducers and their characteristics which can be helpful to them to study the core subjects during their academics. This subject covers the basic needs of instrumentation and it makes the students to understand the importance of instrumentation in industries.

#### **OBJECTIVES:**

On completion of the following syllabus contents, the students must be able to

- Knowing the concept of analog and digital instruments and its characteristics
- Realize the importance of three basic forces required in meters.
- Explain the construction and working of indicating instruments for voltage and current
- Understand the working and applications of Multimeter for  $\Omega$ , V, A measurement.
- Explain the construction, working and applications of CRO.
- Basic knowledge about Bridges ,Displays, Recorders
- Understand the Various types of transducers
- Understand the various types of strain , temperature measurement.
- Understand the various types of force measurement.
- Understand the various pressure measuring devices.
- Understand the Various Flow measuring devices.
- Understand the Various types of Sensors
- Explain ultrasonic, hall effect, pyro electric sensors for various measurements.
- Study advanced sensors for various measurements.
- Understand recent trends in sensors technologies

## 4047430 INDUSTRIAL INSTRUMENTATION AND SENSORS DETAILED SYLLABUS

## Contents: Theory

Unit	Name of the Topics	Hours
I	ANALOG AND DIGITAL INSTRUMENTS	
	1.1 General-definition of measurement - Functions of measurement	3
	system - indicating, Recording and Controlling functions-	
	Applications of measurement systems	
	1.2 Characteristics of Instruments – True value, Accuracy,	2
	Precision, Sensitivity, Reproducibility, Drift, Static Error and	
	Correction, Resolution.	
	1.3 Classification of Instruments - Primary and Secondary	2
	Instruments - indicating, Recording and integrating instruments-	
	calibration-Necessity of calibration	
	1.4 <b>Operating forces</b> – Deflecting, Controlling and Damping force.	1
	1.5 Instruments - Permanent Magnet Moving Coil instrument,	3
	Attraction type Moving Iron Instrument , Analog Multimeter,	
	<b>1.6 Digital Instruments :</b> Auto ranging – Auto zeroing – Auto Polarity –	3
	Block diagram of Digital Multimeter, Digital frequency counter, Digital	
	Tachometer	
	CRO , BRIDGE AND DISPLAYS	
	Chapter 2.1 CRO - Block diagram of oscilloscope, construction and	5
	working of CRT, applications of CRO, Digital Storage Oscilloscope.	
	Chapter 2.2 Bridges - Bridges - measurement of resistance by wheat	5
	stone bridge -measurement of capacitance by Schering Bridge -	
	measurement of inductance by Maxwell's bridge. (derivation not	
	required)	
	Chapter 2.3 Displays – Seven Segment Display, LCD Display	5
III	STRAIN AND FORCE MEASUREMENTS	
	Chapter 3.1 Strain Measurements: - Strain transducers-Strain	7

	measuring techniques- Resistance strain gauge-Strain gauge materials –	
	Metal resistance strain gauges – Bonded and Unbounded type – Metal	
	foil gauges – Semiconductor strain gauge.	
	Chapter 3.2 Force Measurements : - Force – Work – Torque – scales	8
	& balances – equal arm beam balance – pendulum scale- proving Ring	
	- Hydraulic load cell - Pneumatic load cell - Strain gauge load cell	
IV	TEMPERATURE AND PRESSURE MEASUREMENTS	
	Chapter 4.1 Temperature Measurement :Basic Behaviour- Physical	5
	Effects - Temperature Measurement: Mechanical Thermometers - Bi-	
	metallic thermometers- Electrical Thermometers: Resistance	
	Thermometers – Thermistors – Thermocouples – Radiation Pyrometers	
	Chapter 4.2 Flow Measurements: Mechanical Flow Meters : Orifice	4
	Flow Meter - Venturi flow meter - Turbine Meter - Rota Meter	
	Chapter 4.3 Pressure Measurement : Units of pressure – Mechanical	6
	Pressure Measurement: U tube manometer- single column Manometers	
	- Elastic type pressure gauges: Bourdon type – Metallic Diaphragm - ring	
	balance - Pirani Vacuum Gauge	
V	BASIC AND ADVANCED SENSORS:	
	Chapter 5.1 Sensors and Transducers	6
	Definition, difference between sensors and transducers, classification -	
	Active and Passive sensors.	
	Ultrasonic Sensors: for Level Measurement and Distance Measurement.	
	Hall effect Sensors: Hall effect, Hall effect sensors for Fluid level	
	measurement.	
	Chapter 5.2 Pyro electric Sensors: Pyro electric Sensors as Thermal	2
	Detector	
	Chapter 5.3 Fiber optic Sensors: Temperature sensors, Liquid level	6
	sensing, Micro bend sensors, Advantages of fiber optic sensors	
L

### DEPARTMENT OF ELECTRONICS (ROBOTICS) / MECHATRONICS ENGINEERING

# **II YEAR**

## N SCHEME

# **IV SEMESTER**

2020-21 onwards

# MICROCONTROLLER AND ITS APPLICATIONS

(Common with Electronics and Communication Engg)

**CURRICULUM DEVELOPMENT CENTRE** 

### ANNEXURE- III

## STATE BOARD OF TECHNICAL EDUCATION &TRAINING, TAMILNADU DIPLOMA IN ENGINEERING / TECHNOLOGY SYLLABUS N-SCHEME

### (Implemented from the Academic year 2020-2021 onwards)

- Course Name : 1040: Electronics and Communication Engineering
- Subject Code : 4040520
- Semester : V
- Subject Title : Microcontroller and its applications

### **TEACHING AND SCHEME OF EXAMINATION**

No of weeks per semester: 16 weeks

Subject	Instru	uctions	Examination				
	Hours /	Hours /	Marks				
	Week	Semester	Internal Assessment	Total	Duration		
Microcontroller and its Applications	5	80	25	100*	100	3 Hrs.	

\* Examination will be conducted for 100 marks and it will be reduced to 75 marks.

### **Topics and Allocation of Hours**

UNIT	Торіс	Hrs.
I	Architecture of 8051 Microcontroller	15
II	8051 Instruction set and Programming	16
	Peripherals of 8051	15
IV	Interfacing techniques	16
V	Advanced Microcontrollers	11
	Test & Model Exam	7
	Total	80

### **RATIONALE:**

The introduction of this subject will enable the students to learn about microcontroller 8051 architecture, Pin details, Instruction sets, Programming and interfacing. This subject enables the students to do the project effectively. It also helps the students to choose the field of interest. If the student is aiming for higher studies, this subject is foundation.

### **OBJECTIVES:**

On completion of the syllabus, the students must be able to

- -> Know the difference between microprocessor and microcontroller.
- -> Understand the architecture of 8051.
- -> Write programs using 8051 ALP.
- -> Understand the programming of I/O ports, Timer, Interrupt and Serial Programming.
- -> Use the interfacing techniques
- -> Know the types of microcontrollers
- -> Explain IoT.

## 4040520 MICROCONTROLLER AND ITS APPLICATIONS DETAILED SYLLABUS

Contents: Theory

Unit	Name of the Topics	Hours
	Architecture Of 8051 Microcontroller	15
	1.1 : Architecture	
	Microprocessor-Microcontroller-Comparison of microprocessor and	
	microcontroller-Architecture diagram of microcontroller 8051-Functions of	
	each block-Pin details of 8051-ALU- ROM-RAM-Memory organization of	
	8051- Special function registers-Program counter-PSW register-Stack-	
	I/O ports-Timer-Interrupt-serial port-External memory- Oscillator and	
	Clock-Reset-Power on reset-Clock cycle-machine cycle-Instruction cycle-	
	Overview of 8051 family.	
II	8051 Instruction set and programming	8
	2.1: Instruction Set Of 8051	
	Instruction set of 8051-Classification of 8051 instructions-data transfer	
	instructions-Arithmetic instructions-Logical instructions-Branching	
	instructions-Bit manipulation instructions- Assembling and running an	
	8051 program-Structure of Assembly language-Assembler directives-	
	Different Addressing modes of 8051-Time delay routines.	
	2.2: Assembly language programs	
	16 bit addition and 16 bit subtraction-8 bit multiplication and 8 bit division-	
	BCD to HEX code conversion-HEX to BCD code conversionSmallest	8
	number/ Biggest number.	
	Peripherals of 8051	
	3.1: I/O Ports	3
	Bit addresses for I/O ports-I/O port programming-I/O bit manipulation	
	programming.	
	3.2: Timer/Counter	
	SFRS for Timer- Modes of Timers/counters- Programming 8051	4
	Timer(Simple programs).	
	3.3: Serial Communication	4
	Basics of serial communication-SFRs for serial communication-RS232	

	standard-8051 connection to RS 232-8051 serial port programming	
	3.4: Interrupts	
	8051 interrupts-SFRs for interrupt-Interrupt priority.	
		4
IV	Interfacing Techniques	
	4.1: IC 8255	3
	IC 8255-Block diagram-Modes of 8255-8051 interfacing with 8255	
	4.2: Interfacing	
	Interfacing external memory to 8051-Relay interfacing- Sensor	13
	interfacing -Seven segment LED display interfacing-Keyboard	
	interfacing-Stepper motor interfacing-ADC interfacing- DAC interfacing-	
	DC motor interfacing using PWM-LCD interfacing.	
V	Advanced Microcontrollers	8
	5.1: Types of microcontrollers	
	PIC microcontroller-General Block diagram-Features-Applications-	
	Arduino- General Block diagram-Variants-Features-Applications-	
	Raspberry pi-General Block diagram-Features-Applications-Comparison	
	of microcontrollers.	
	5.2: IoT	
	Introduction to IoT-Block diagram of home automation using IoT.	3

## STATE BOARD OF TECHNICAL EDUCATION &TRAINING, TAMILNADU DIPLOMA IN ENGINEERING / TECHNOLOGY SYLLABUS N-SCHEME

### (Implemented from the Academic year 2020-2021 onwards)

- Course Name : 1040, Electronics and Communication Engineering
- Subject code : 4040460
- Semester : IV
- Subject title : ANALOG AND DIGITAL ELECTRONICS PRACTICAL

### TEACHING AND SCHEME OF EXAMINATION

Instruction		ruction				
				Marks		
Subject	Hours /week	Hours /semester	Internal Assessment	Board Examination	Total	Duration
Analog and Digital Electronics Practical	5	80	25	100*	100	3 Hours

No. of weeks/ Semester: 16weeks

\* Examination will be conducted for 100 marks and it will be reduced to 75 marks.

### **RATIONALE:**

Every Electronic Engineer should have sound knowledge about the ICs used in Electronics Industry. This is vital in R&D Department for Chip level troubleshooting. To meet the industrial needs, diploma holders must be taught about the most fundamental subject, Analog and Digital Electronics Practical. By doing practical experience in this, they will be skilled in handling all types of ICs and able to apply the skill in electronic system design and the designing of PCBs.

### **OBJECTIVES:**

On completion of the following experiments, the students must be able to

- > Know the Verification of truth table of OR, AND, NOT, NOR, NAND, EX-OR gates
- > Know the Realization of basic gates using NAND & NOR gates.
- > Know the verification of Half Adder and Full Adder using IC's.
- > Know the verification of Half Subtractor and Full Subtractor using IC's.

- > Know the Verification of Truth Table for Decoder/Encoder.
- > Know the Verification of truth table for RS, D, T & JK flip-flop.
- > Test Inverting Amplifier and Non inverting amplifier using Op-amp
- > Test Summing Amplifier, Difference Amplifier and Voltage Comparator using Op-amp.
- > Test Integrator and Differentiator.
- > Test Astable multivibrator using IC 555
- > Design IC Voltage Regulator Power Supplies using IC 7805, IC 7912
- > Design the PCB of 4- bit ripple counter using FF

## 4040460 ANALOG AND DIGITAL ELECTRONICS PRACTICAL DETAILED SYLLABUS

**Contents: Practical** 

### Exercises

### Note: At least 6 experiments should be constructed using breadboard

- 1. Realization of basic gates using NAND & NOR gates.
- 2. Realization of logic circuit for De-Morgans Theorems
- 3. Test the performance of Half Adder and Full Adder.
- 4. Test the performance of Half Subtractor and Full Subtractor.
- 5. Test the performance of Decoder/Encoder.
- 6. Test the performance of RS, D, T & JK flip-flops.
- 7. Test the performance of Parity generator and checker using parity checker/ generator IC's.
- 8. Test the performance of Multiplexer/De-multiplexer using IC 4051
- 9. Test the performance of Inverting Amplifier and Non inverting amplifier using Op-amp IC 741.
- 10. Test the performance of Summing Amplifier, Difference Amplifier.
- 11. Test the performance of Zero Crossing Detector and Voltage Comparator using Opamp IC 741.
- 12. Test the performance of Integrator and Differentiator using Op-amp IC 741.
- 13. Test the performance of Astable multivibrator using IC 555.
- 14. Test the performance of IC Voltage Regulator Power Supplies using IC 7805, IC 7912.

15. Design the PCB of 4- bit ripple counter using FF using Software tool Multisim / OrCAD etc

### **RATIONALE:**

Instrumentation and sensors are used in automation in construction, domestic appliances industries, Robotics, transport, space exploration, defense equipment, health services and other applications. Transducers have achieved substantial accuracy and control in Industrial automation.

To impart practical knowledge to the diploma students, practical subjects are introduced for every corresponding theory subject. This practical supports the aim and objective of Industrial instrumentation and sensors subjects.

### **OBJECTIVES:**

On completion of the following experiments, the students must be able to

- Calibrate the meters
- > Measure the unknown resistance, Capacitance using different bridge circuits
- > Measure the physical parameter with various sensors
- > Test the various kind of sensors
- > Simulate the sensor circuit with simulation software

## 4047460 INDUSTRIAL INSTRUMENTATION AND SENSORS PRACTICAL DETAILED SYLLABUS

### Contents: Practical

### Name of the Topics:

- 1. Calibration of given ammeter and voltmeter
- 2. Measurement of power and power factor of single phase load and plot the graph
- 3. Measurement of unknown resistance using Wheatstone bridge.
- 4. Measurement of value of unknown capacitance using Schering Bridge
- 5. Generate different type of Lissajous Patterns using CRO
- 6. Measure the force using Strain gauge experiment module
- 7. Measure the sensing range of Inductive proximity sensor
- 8. Measure the sensing range of capacitive proximity sensor
- 9. Detect the level of water in a tank using float switch and control the pump based on the level
- 10. Construct and test the circuit for Detecting metal and non metal object using proximity sensor
- 11. Construct and test the circuit for Detecting the Object using IR sensor
- 12. Construct and test the circuit to Measure the temperature using temperature sensor ( Thermocouple OR RTD)

13. Construct and test the circuit to Measure the sensing range of Analog Ultrasonic sensor module

(Students can also be given exposure to simulation software)

### **RATIONALE:**

The introduction of this subject will enable the students to have hands on experience in using 8051 trainer kit. The students are exposed to learn simple programs using assembly language. They can also get familiar with the C compiler platform. They also gain knowledge by using application specific interfacing boards.

### **OBJECTIVES:**

The students are able to

- -> Understand the use of instruction set by writing and executing simple ALP.
- -> Know the connection details between microcontroller and peripherals.

## 4040550 MICROCONTROLLER PRACTICAL DETAILED SYLLABUS

Contents: Practical **Exercises** 

Part A

The following experiments should be written using 8051 assembly language program and should be executed in the 8051 microcontroller trainer kit.

- 1.8/16 bit addition
- 2.8/16 bit subtraction
- 3.8 bit multiplication
- 4.8 bit division
- 5. BCD to Hex code conversion
- 6. Hex to BCD code conversion
- 7. Smallest / Biggest number
- 8. Time delay routine (Demonstrate by Blinking LEDS).
- 9. Using Timer/ counter of 8051

### Part B (Interfacing Application Boards)

# The following experiments can be written using C compiler or 8051 assembly language and to be executed.

- 10. Interfacing Digital I/O board
- 11. Interfacing DAC
- 12. Interfacing Stepper motor
- 13. Interfacing Seven segment LED display or LCD
- 14. Sending data through the serial port between microcontroller kits
- 15. Interfacing DC motor using PWM.

### **BOARD EXAMINATION**

### Note:

1. Students are provided with Hex code sheet for manual hand assembly.

### **Topics and Allocation of Hours**

UNIT	Торіс	Hrs.
I	Linear actuators, Rotary actuators and Control Valve (Direction, Pressure & flow)	16
П	Hydraulic System & its components	16
Ш	Pneumatics system	14
IV	Basic concepts of PLC	14
V	Programming and Applications of PLC	13
	Test & Model Exam	7
	Total	80

### RATIONALE:

Hydraulics and pneumatics systems plays a vital role in the Automation world. Adequate Knowledge in hydraulic and pneumatic components, principle of working, usage of components & maintenance of components is necessary in the field of automation. Familiarization of PLC, Knowledge about Developing ladder diagrams, usage of timer & counter is necessary in the field of automation.

### **OBJECTIVES:**

- To Familiarize Understand & Explain various linear actuators.
- To Understand & Explain various rotary actuators.
- To Understand & Explain various directional control valves.
- To Understand & Explain various pressure control valves.
- To Understand & Explain Various Hydraulic components.
- To Understand & Explain Various Directional Control valves.
- To Understand & Explain Various Pneumatic system.
- Interpolate the hydraulic and pneumatic systems
- Understand Basic concepts of PLC.
- Understand the various module of PLC parts
- Develop ladder diagram for the various process of automation
- Applications of PLC

## 4047510 INDUSTRIAL AUTOMATION DETAILED SYLLABUS

## Contents: Theory

Unit	Name of the Topics	Hours
I	Linear actuators, Rotary actuators and Control Valve (Direction,	
	Pressure & flow)	
	Chapter 1.1 Linear Actuators - Hydraulic Cylinders - Cylinder Types-	4
	Single Acting cylinder -Gravity Return cylinder-Spring Return cylinder -	
	Telescopic Cylinder – Hydraulic Ram –Tandem Cylinder, Symbols and	
	working principles only	
	Chapter 1.2 Rotary actuators-motor types -gear motor-balanced vane	3
	motor-piston motortwo vane rotor actuator-rack AND pinion rotary	
	actuator-motor torque -speed - power -efficiency -symbols -	
	applications –specifications.	
	Chapter 1.3 Directional Control Valves:-Check Valve-Shuttle Valves-	3
	Two Way Directional Control Valves -Three Way Directional Control	
	Valves -Four Way Directional Control Valves – Directional Control Valves	
	Actuation types-Symbols- Working Principles-	
	Chapter 1.4 Pressure Control Valve: Pilot Operated, Pressure Relief	3
	Valve – Pressure Reducing Valve – Sequence Valve – Symbols- Working	
	Principles	
	Chapter 1.5 Flow Control Valve - Type - Needle Valve - Pressure	3
	Compensated Flow Control Valve-Cushioned Cylinders – Flow Dividers –	
	Balanced Spool Flow Divider- Rotary Flow Divider	
II	Hydraulic System & its components	
	Chapter 2.1 Hydraulic Components - Accumulators - types -	5
	Diaphragm - Spring Loaded -Weight Loaded -Pressure Intensifiers -	
	Hydraulic Reservoirs-Heat Exchanger types- Air cooled –Water cooled -	
	Filters.	
	Chapter 2.2 Instrumentation and Measurement: Pressure Gauges-	3
	Flow meters- Temperature Gauges	

Chapter 2.3 Conduits and Fittings - Pipe - Tubing -Hose - Seals a	
	nd 2
Bearings – Hydraulic Fluids	
Chapter 2.4 Hydraulic Circuits: - Counter Balance Circuit - Sequen	ce 4
Circuit- Speed Control Circuit-Meter in Circuit -Meter Out Circu	it-
Intermittent Feed Control-Speed Control For Continous Processing	
Chapter 2.5 Booster and Intensifier Circuits - Force Multiplication	- 2
Pressure Intensification.	
III Pneumatics system	
Chapter 3.1 Pneumatics - Basic principles of pneumatics-differen	ce 10
between hydraulics and pneumatics-compressor types-two stage pist	on
compressorrotary vane compressor-rotary screw compressorvacuu	m
pumps- double acting pneumatic cylinder-gear motor-pressure regulat	or
-filters-lubricators-FRL unit-water removal - air preparation a	nd
distribution	
Chapter 3.2 Electronic control of fluid power - solenoid valves-ser	vo 4
valves pump controls.	
IV BASIC CONCEPTS OF PLC <u>Chapter 4.1 Introduction</u> - Introduction to Programmable Log	Jic 6
controller – Hardwired circuits versus PLC control – Advantages of PI	
	-
control – Relays – Block diagram of PLC – Processor – Memory – Inp	.C
	.C ut
control – Relays – Block diagram of PLC – Processor – Memory – Inp	.C ut
control – Relays – Block diagram of PLC – Processor – Memory – Inp and output modules – Digital and Analog I/O's – principle of operation	Cut
control – Relays – Block diagram of PLC – Processor – Memory – Inp and output modules – Digital and Analog I/O's – principle of operation various modes of operation	.C ut
control – Relays – Block diagram of PLC – Processor – Memory – Inp and output modules – Digital and Analog I/O's – principle of operation various modes of operation Chapter 4.2 PLC Scan - memory organization	-C ut - - 4
control – Relays – Block diagram of PLC – Processor – Memory – Inp and output modules – Digital and Analog I/O's – principle of operation various modes of operation Chapter 4.2 PLC Scan - memory organization Communication with PLC	-C 4 -C 4
<ul> <li>control – Relays – Block diagram of PLC – Processor – Memory – Inpland output modules – Digital and Analog I/O's – principle of operation various modes of operation</li> <li><u>Chapter 4.2 PLC Scan</u> - PLC scan – memory organization Communication with PLC</li> <li><u>Chapter 4.3 PLC Module</u> - Types of Programming Devices - PL</li> </ul>	-C 4 - 4 -C 4
<ul> <li>control – Relays – Block diagram of PLC – Processor – Memory – Inpand output modules – Digital and Analog I/O's – principle of operation various modes of operation</li> <li><u>Chapter 4.2 PLC Scan</u> - PLC scan – memory organization Communication with PLC</li> <li><u>Chapter 4.3 PLC Module</u> - Types of Programming Devices - PLT</li> <li>Types (Fixed and Modular) - Sinking and Sourcing I/O modules</li> </ul>	-C 4 - 4 -C 4
<ul> <li>control – Relays – Block diagram of PLC – Processor – Memory – Inpland output modules – Digital and Analog I/O's – principle of operation various modes of operation</li> <li><u>Chapter 4.2 PLC Scan</u> - PLC scan – memory organization</li> <li>Communication with PLC</li> <li><u>Chapter 4.3 PLC Module</u> - Types of Programming Devices - PL</li> <li>Types (Fixed and Modular) - Sinking and Sourcing I/O modules</li> <li>Remote I/O –Talking to other PLC and computers – Criteria for selection</li> </ul>	-C 4 - 4 -C 4
<ul> <li>control – Relays – Block diagram of PLC – Processor – Memory – Inpand output modules – Digital and Analog I/O's – principle of operation various modes of operation</li> <li><u>Chapter 4.2 PLC Scan</u> - PLC scan – memory organization Communication with PLC</li> <li><u>Chapter 4.3 PLC Module</u> - Types of Programming Devices - PL Types (Fixed and Modular) - Sinking and Sourcing I/O modules Remote I/O –Talking to other PLC and computers – Criteria for selection of suitable PLC – List of various PLCs available</li> </ul>	-C ut - - 4 - - - - - - - - - - -
control – Relays – Block diagram of PLC – Processor – Memory – Inpland output modules – Digital and Analog I/O's – principle of operation various modes of operation         Chapter 4.2 PLC Scan       - PLC scan – memory organization         Communication with PLC       Chapter 4.3 PLC Module         Chapter 4.3 PLC Module       - Types of Programming Devices - PL         Types (Fixed and Modular) - Sinking and Sourcing I/O modules         Remote I/O –Talking to other PLC and computers – Criteria for selection         of suitable PLC – List of various PLCs available         V       PROGRAMMING AND APPLICATIONS OF PLC	-C ut - - 4 - - - - - - - - - - - - - - - -

instruction – math instruction – Time and Date – Printed reports	
Chapter 5.2 Application of PLC - Ladder diagrams for DOL starter -	8
Ladder diagrams for star- delta starter – Cylinder sequence Application –	
Cylinder sequence using counter – Ladder diagram using Latch circuit –	
Ladder diagram using Timer – Ladder diagram using counter – sequence	
of the operation and ladder diagram for multicylinder application -	
sequence of the operation and ladder diagram for Compressor control -	
Message display – operator input and display– Traffic Displays

Course Name : Diploma in Mechatronics Engineering / Electronics (Robotics) Engineering

Subject Code : 4047520

Semester : V Semester

Subject Title : Robotics

### TEACHING AND SCHEME OF EXAMINATION

No of weeks per semester: 16 weeks

	Instru	ictions	Examination			
Subject	Hours /	Hours /	Marks			
	Week Semester	Internal Assessment	Board Examinations	Total	Duration	
Robotics	5	80	25	100*	100	3 Hrs.

\* Examinations will be conducted for 100 marks and it will be reduced to 75 marks.

#### **Topics and Allocation of Hours**

UNIT	Торіс	Hrs.		
I	FUNDAMENTALS OF ROBOT TECHNOLOGY	15		
II	ROBOT CONTROLLER, DRIVE SYSTEMS ANDEND EFFECTERS	16		
III	SENSORS AND MACHINE VISION	14		
IV	ROBOT KINEMATICS AND ROBOT PROGRAMMING	14		
V	ROBOT APPLICATIONS	14		
	Test & Model Exam			
	Total	80		

#### **RATIONALE:**

Rapid industrialization and globalization needs industries to be more C competitive and deliver cost effective quality products. This needs industries to implement flexible manufacturing systems where Robotic technology plays major role. Hence study of robotic technology is very essential.

#### **OBJECTIVES:**

On completion of the following syllabus contents, the students must be able to

- Understand fundamentals of robotics
- Acquire knowledge structure and elements of robot
- Gain knowledge on controller and various drives used in robotics
- Develop knowledge on role of sensors and vision system
- Acquire skill to program and control robot
- Understand to adopt robot to various industrial applications.

### **4047520 ROBOTICS**

#### **DETAILED SYLLABUS**

#### Contents: Theory

Unit	Name of the Topics	Hours
	FUNDAMENTALS OF ROBOT TECHNOLOGY	
	Chapter 1.1 History of Robot - Introduction - History of robot -	5
	Definitions - Robot Anatomy - Basic configuration of Robotics - Robot	
	Components – Manipulator, End Effecter, Drive system, Controller and	
	Sensors.	
	Chapter 1.2 Robot arm - Mechanical arm - Degrees of freedom - Links	5
	and joints – Types of joints – Joint notation scheme –Degrees of freedom	
	associated with arm and body -Degrees of freedom associated with wrist	
	Chapter 1.3 Classification of robots - Cartesian, Cylindrical, spherical,	5
	horizontal articulated (SCARA) vertical articulated – Work envelope, Work	

	Volume – Comparison of Work envelope and Work volume. Introduction to			
	PUMA robot			
II	ROBOT CONTROLLER, DRIVE SYSTEMS AND END			
	EFFECTERS			
	Chapter 2.1 Robot controller – Configuration - Four types of controls –	4		
	Open loop and closed loop controls -servo systems- Speed of response			
	and stability – Precision of movements: Spatial resolutions, accuracy and			
	repeatability			
	Chapter 2.2 Drive system - Pneumatic drives - Hydraulic drives -	4		
	Electrical drives – Stepper motors, Servo motors – Salient features –			
	Applications and Comparisons of Drives.			
	Chapter 2.3 Feedback Devices - Potentiometers - Optical encoders -	4		
	Resolvers -dc Tachometer			
	Chapter 2.4 End effecters – Grippers – Mechanical Grippers, Magnetic	4		
	Grippers, Vacuum Grippers, Adhesive Grippers, Hooks, Scoops and other			
	miscellaneous Devices- Two fingered and three fingered Grippers,			
	Internal and External Grippers – End Of Arm Tooling (EOAT) -			
	Considerations in Gripper Selection and Design considerations			
III	SENSORS AND MACHINE VISION			
	<b><u>Chapter 3.1 Sensors</u></b> - Requirements of Sensors – Sensor devices used	5		
	in robot work cell - Principles and applications of the following types of			
	sensors – Piezo - Electric sensors, LVDT – Range sensors – Proximity			
	sensors – Tactile sensors-Touch sensors - Force sensors - Photo electric			
	sensor.			
	Chapter 3.2 Machine Vision System – Sensing and digitizing image data	5		
	<ul> <li>Signal conversion – Image storage – Lighting techniques – Image</li> </ul>			
	processing and analysis – Data reduction- Segmentation: Thresholding,			
	Region Growing Edge detection- Feature extraction and object recognition			
	<ul> <li>Applications – Inspection, Identification, Visual serving and navigation.</li> </ul>			
	Chapter 3.3 Robot operation Aids -Teach pendant-Manual data input			
	panel- Computer control	4		

/ R	OBOT KINEMATICS AND ROBOT PROGRAMMING	
<u>c</u>	hapter 4.1 Robot Motion Analysis- Forward kinematics and Reverse	4
ki	inematics of manipulators with Two and Three degrees of freedom -	
R	obot dynamics	
<u>c</u>	hapter 4.2 Robot programming - Lead through methods: Powered	
L	ead through method and manual lead through Method- textual robot	5
la	anguages – Methods of Defining Positions in space - Motion interpolation.	
<u>c</u>	hapter 4.3 Robot languages – The Textual Robot Languages -	
G	Seneration of robot programming languages- Robot Language Structure	
-	On-Line & Off-Line programming – Basic Robot commands – Motion	5
С	commands, Speed Commands ,Defining Points and Paths in the work	
s	pace ,Sensor Commands, End Effector Commands, WAIT, SIGNAL and	
D	ELAY COMMANDS, Program Sequence Control and Sub-routines -	
si	imple programs - Introduction to Artificial intelligence	
/ R	OBOT APPLICATIONS AND ECONOMIC ANALYSIS	
<u>c</u>	hapter 5.2 Industrial Applications of Robots - Material handling	5
A	pplications - Material transfer - Pick and Place Operations-Palletizing -	
D	E palletizing – press loading and unloading – Die casting – Machine	
to	ool loading and unloading – Spot welding – Arc welding – Spray painting	
-	Assembly Finishing – Automatic Guided Vehicle-Rail Guided vehicle	
<u>c</u>	Chapter 5.3 Adopting robots to workstations - Robot cell layouts -	5
R	equisite robot characteristics and Non requisite robot characteristics -	
S	tages in selecting robots for industrial applications - Safety	
C	onsiderations for robot operations – Robotics in the future.	
<u>c</u>	hapter 5.4 Economic analysis of robots - cost data required for the	4
a	nalysis – Methods of economic analysis – Pay back method – Equivalent	
u	niform annual cost method (EUAC)– Return on investment(ROI) method

#### RATIONALE:

C is the most widely used computer language, which is being taught as a core course. C is a general purpose structural language that is powerful, efficient and compact, which combines features of high level language and low-level language. It is closer to both Man and Machine. Due to this inherent flexibility and tolerance it is suitable for different development environments. Due to these powerful features, C has not lost its importance and popularity in recently developed and advanced software industry. C can also be used for system level programming and it is still considered as first priority programming language. This subject covers the basic concepts of C. It will also act as a "Backbone" for all programming languages.

#### **OBJECTIVES:**

On completion of the following syllabus contents, the students must be able to

- Define Program, Algorithm and flow chart
- List down and Explain various program development steps
- Write down algorithm and flow chart for simple problems.
- Describe the concepts of Constants, Variables, Data types and operators.
- Develop programs using input and output operations.
- Use of command line arguments.
- Explain compiler controlled directives.
- Understand the structure and usage of different looping and branching statements.
- Define arrays and string handling functions.
- Explain user-defined functions, structures and union.
- Define pointers and using the concept of Pointers.
- Understand the methods of handing files.
- Understand dynamic memory management.

### 4047531 C PROGRAMMING LANGUAGE

### DETAILED SYLLABUS

### Contents: Theory

Unit	Name of the Topics	Hours				
I	Program Development & Introduction to C					
	Chapter 1.1 Program, Algorithm & flow chart: Program development	4				
	cycle- Programming language levels & features. Algorithm – Properties &					
	classification of Algorithm, flow chart – symbols, importance &					
	advantages of flow chart.					
	<b><u>Chapter 1.2 Introduction to C</u></b> : - History of C – features of C- structure	4				
	of C program – Compile, link & run a program. Diagrammatic					
	representation of program execution process.					
	Chapter 1.3 Variables, Constants & Data types: C character set-	3				
	Tokens- Constants- Key words – identifiers and Variables – Data types					
	and storage – Data type Qualifiers – Declaration of Variables – Assigning					
	values to variables- Declaring variables as constants.					
	Chapter 1.4 C operators: - Arithmetic, Logical, Assignment, Relational,	4				
	Increment and Decrement, Conditional, Bitwise, Special Operators,					
	Operator precedence and Associativity. C expressions – Arithmetic					
	expressions – Evaluation of expressions					
II	I/O STATEMENTS, DECISION MAKING AND LOOPING					
	STATEMENTS					
	<b><u>Chapter 2.1 I/O statements:</u></b> Formatted input, formatted output,	3				
	Unformatted I/O statements					
	Chapter 2.2 Branching: Introduction – Simple if statement – ifelse	6				
	statement – else-if ladder, nested if-else statement - switch statement –					
	goto statement – simple programs					
	Chapter 2.3 Looping statements: - while statement, do-while statement,	6				
	for loop statement, nested looping statements, break & continue					
	statement – simple programs					
III	ARRAYS, STRINGS AND FUNCTIONS					
	<b><u>Chapter 3.1 Arrays</u></b> - Declaration and initialization of One dimensional,	4				
	Two dimensional and Character arrays – Accessing array elements –					

	Programs using arrays.	
	Chapter 3.2 Strings: - Declaration and initialization of string variables,	3
	Reading String, Writing Strings – String handling functions – String	
	manipulation programs.	
	Chapter 3.3 Built in functions: - Math functions - Console I/O	3
	functions – Standard I/O functions – Character Oriented functions.	
	Chapter 3.4 User defined functions: - Advantages, Defining functions,	5
	Function call, return values, Categories of functions – Recursion – simple	
	programs	
IV	STRUCTURES, UNIONS, POINTERS AND DYNAMIC MEMORY	
	MANAGEMENT	
	Chapter 4.1 Structures and Unions:- Structure – Definition,	5
	initialization, arrays of structures, Arrays with in structures, structures	
	within structures, Structures and functions – Unions – Structure of Union	
	<ul> <li>Difference between Union and structure – simple programs</li> </ul>	
	Chapter 4.2 Introduction to pointers :- Definition - advantages of	5
	pointers - accessing the address of a variable - declaring of pointer	
	variables - assigning address to pointer variables - accessing variable	
	value through pointer	
	Chapter 4.3 Dynamic memory management :- definition, advantages,	4
	Functions used in dynamic memory allocation, allocating a block of	
	memory, allocating multiple blocks of memory, releasing a block of	
	unused memory, altering the size of a block	
V	FILE MANAGEMENT AND PREPROCESSORS	
	Chapter 5.1 File Management: Introduction-Defining and opening a file-	6
	closing a file-Input / Output operations on files — Error handling during	
	I/O operations – Random Access to files	
	Chapter 5.2 Command line arguments: Introduction - argv and argc	4
	arguments – simple programs using command Line Arguments	
	Chapter 5.3 Pre-processor: Introduction – Macro Substitution, File	4
	inclusion, Compiler control directives.

	Total	80		

#### RATIONALE

Developments in Electronics have their own impact in other fields of Engineering. Today all the Controls and Drives for the Electrical Machines are formed by Electronic Components and there are many Electronic Devices available to handle Eclectic Power in terms Kilo-Amps and Kilo-Volts. This subject gives a comprehensive knowledge base about the devices and circuits used in Electrical Power Control.

#### OBJECTIVES

On completion of these units, the student should be able to:

- Explain the scope and application of Power Electronics
- Explain the operating region and working of Thyristor family devices.
- Explain and state the application for Commutation Circuits and Trigger Circuits of SCR.
- Familiarize the Phase Controlled Rectifier for different kinds of Loads.
- Study the complete protection of Converter Circuits.
- Understand the working and applications of different types of Choppers and Inverters.
- Understand the application of Power Electronics devices as UPS, SMPS.
- Understand the control of DC Drives.
- Know the various methods of Speed Control of DC Drives.
- Familiarize the Control of AC Drives.
- Study the Speed Control of Three Phase Induction Motor using PWM and Slip Power Recovery Scheme.
- Understand the Closed Loop Control of DC Drive and AC Drive.
- Know the operation of Single Phase and Three Phase Cyclo Converter.
- Study the need of Microcomputer Based Motor Control.

### **DETAILED SYLLABUS**

### Contents: Theory

Unit	Name of the Topics				
	THYRISTOR FAMILY, TRIGGER AND COMMUTATION CIRCUITS				
	Thyristor Family (Review) –SCS, SUS, SBS, LASCR and GTO. Symbol,				
	Circuit, Working, Characteristics and Applications - UJT, SCR, DIAC,				
	TRIAC, IGBT, GTO and MOSFET. Gate Triggering Circuits -				
	Requirements, Types. Circuit, working of $-R$ , RC, Synchronized UJT				
I	Triggering Circuits. Pulse Transformer in Trigger Circuits — IC	7			
	based Advance Triggering Circuits for SCR & TRIAC (Using IC TCA				
	785) - Driver and Power circuits for Thyristor.				
	Commutation Circuits – SCR Turn Off Methods – Natural Commutation				
	-Forced Commutation - Class A, Class B, Class C, Class D, Class E	6			
	and Class F. SCR rating and their importance.				
	PHASE CONTROLLED RECTIFIERS				
	Introduction — Phase Controlled Rectifiers. Circuit Diagram, Working and				
	Waveform - Half Wave, Full Wave Controlled Rectifier with Resistive,				
	Inductive Loads and Free Wheeling Diode - Single Phase Fully				
П	Controlled Bridge, Single Phase Dual Converter with R Load, RL Load -	8			
	Single Phase Semi Converter with Continuous and Discontinuous Load				
	Current. AC – AC Converter.				
	Three Phase Half Controlled Bridge, Fully Controlled Bridge with RL	7			
	Load - Complete Protection of Thyristors against Surge Current, Surge				
	Voltage, Dv/Dt, Di/Dt Protection.				

	CHOPPERS AND INVERTERS	
	<b>Choppers</b> — Introduction, Principle of Chopper Operation. Control	
	Strategies — Constant Frequency System and Variable Frequency	
	System. Chopper Circuit Classification – Step Up Chopper, Step Down	
	Chopper, Voltage, Current, Load Commutated Chopper, Fist Quadrant,	
	Second Quadrant, Two Quadrant and Four Quadrant Choppers. Circuit	
	Diagram, Working and Waveform – Step Up Chopper, Morgan Chopper,	8
	Jones Chopper. Applications of Choppers – SMPS	
	Inverters – Introduction, Classification of Inverter. Circuit Diagram,	
	Working and Waveform Parallel Inverter, Half Bridge Inverter, Full Bridge	3
	Inverter, Modified MC Murray Full Bridge Inverter, MC Murray Bedford	Ū
	Full Bridge Inverter.	
	Three Phase Bridge Inverter Under 180° Mode,120° Mode Operations -	4
	Pulse Width Modulated Inverters, (Single Pulse, Multiple Pulse,	
	Sinusoidal Pulse) Applications of Inverters — UPS - Online, Offline.	
	CONTROL OF DC DRIVES	
	Introduction — DC Drive. Basic DC Motor Speed Equation —	
	Operating Region, Armature Voltage Control, Field Current Control,	
	Constant Torque and Constant HP Regions - Circuit Diagram, Output	7
	Waveforms and Output Equation of — Separately Excited DC Motor in	
	— A) Single Phase Full Converter Drives B) Single Phase Dual	
IV	Converter Drives C)Three Phase Semi Converter Drives.	
	DC Chopper for Series Motor Drive – Four Quadrant Control of DC Motor	
	- DC to DC Converter using MOSFET and IGBT - Block Diagram,	8
	Explanations of Closed Loop Control of DC Drives, Phase Locked Loop	
	Control of DC Drives - Microprocessor Based Closed Loop Control of DC	
	Drives.	
	1	

	CONTROL OF AC DRIVES	
	Introduction AC Drive - Torque Speed Characteristics of Three Phase	
	Induction Motor, Speed Control of Induction Motor, Stator Voltage	8
	Control, Variable Frequency Control, Necessity of Maintaining V/F Ratio.	
V	Rotor Resistance Control Inverters for Variable Voltage and Variable	
V	Frequency Control -Static VAR Compensation.	
	Speed Control by Rotor Resistance for Slip Ring Induction Motors -	
	Static Scherbius Drive (Slip Power Recovery Scheme) - Closed Loop	7
	Control of AC Drive Block Diagram — Micro Computer based PWM	
	Control of Induction Motor – Introduction to Cyclo Converter with Simple

(Common with Mechanical Engg) CURRICULUM DEVELOPMENT CENTRE

#### STATE BOARD OF TECHNICAL EDUCATION &TRAINING, TAMILNADU DIPLOMA IN ENGINEERING / TECHNOLOGY SYLLABUS

#### N-SCHEME (Implemented from the Academic year 2020 - 2021 onwards)

- Course Name : 1020 Diploma in Mechanical Engineering
- Subject Code : 4020532
- Semester : V Semester
- Subject Title : Green Energy and Energy Conservation

#### **TEACHING AND SCHEME OF EXAMINATION**

No of weeks per semester: 16 weeks

	Instructions		Examination			
Subject	Hours /	Hours /	Marks			
	Week	Semester	Internal Assessment	Board Examinations	Total	Duration
Green Energy and Energy Conservation	5	80	25	100*	100	3 Hrs.

\* Examinations will be conducted for 100 marks and it will be reduced to 75 marks.

#### **Topics and Allocation of Hours**

UNIT	IIT Topic			
Ι	Fundamentals of Energy, Geothermal energy, Wind energy			
П	Bio mass energy, Solar Energy	15		
	Photovotaic (PV)	15		
IV	PV Technologies, Applications	14		
V	V Energy conservation			
	TEST & MODEL EXAM			
	Total	80		

#### RATIONALE:

There is an ever increasing demand for energy in spite of the rising prices of oil & other fossil fuel / depletion of fossil fuels. Energy demand, in particular electricity production has resulted in creation of fossil fuel based power plants that let out substantial greenhouse gas / carbon emission into the atmosphere causing climate change and global warming. We have various forms of renewable energy sources viz., Wind, Solar, Biomass, Biogas, etc. Municipal and Industrial wastes could also be useful sources of energy while ensuring safe disposal. This subject is introduced to learn about the major renewable energy sources and more focus on the PV module solar energy. The government act and guidelines are discussed for the benefit of the Diploma Engineers.

#### **OBJECTIVES:**

On completion of the following syllabus contents, the students must be able to

- 1 Study about the fundamentals of Energy.
- 2 Study of construction and principle of Wind energy, Solar energy, Geo thermal and Bio energy.
- 3 Understand the solar energy.
- 4 Understand the PV design and its components.
- 5 Study the energy conservation process.
- 6 Understand the Government Policies and Acts.
- 7 Study the TEDA projects in Tamil Nadu.

## 4020532 GREEN ENERGY AND ENERGY CONSERVATION DETAILED SYLLABUS

### Contents: Theory

Unit	Name of the Topics	Hours
	Fundamentals of Energy, Geothermal energy, Wind energy	
	Energy: Introduction – Energy need and trends - Forms of Energy – First	5
	Law of Thermodynamics - Second Law of Thermodynamics - energy	
	requirement and supply - Fossil fuels and climate changes - need of	
	renewable energy sources - Current renewable energy uses -	
	Renewable energy policies in India.	
	Geothermal energy: Introduction – Essential characteristic –	4
	Sources – Power Plants – Single flash power plant – double flash power	
	plant – Flow diagram and principle only.	
	Wind energy: Introduction - energy conversion - site selection	6
	considerations – Components of wind energy conversion system –	
	Classification. Wind mill: Horizontal axis machines - Vertical axis	
	machines – working principle, advantages and disadvantages. Schemes	
	for electric generation.	
II	Bio mass energy, Solar Energy	
	Bio mass energy: Introduction – conversion technologies: Wet	7
	processes – dry processes. Bio gas generation – factors affecting the bio	
	gas generation – classification of bio gas plants – Bio gas plant –	
	construction - advantages and disadvantages. Materials used for bio gas	
	generation – factors to be considered for the selection of site.	
	Solar Energy: Introduction - Sun's energy: advantages - conversion	8
	challenges- The Sun-Earth movement - Solar radiation - Different angles	
	- optimal angle for fixed collector, in summer and winter. Sun tracking -	
	measuring instruments of solar radiation - methods to estimate solar	
	radiation.	
	Photovotaic (PV)	
	Photovotaic (PV): Semiconductors as solar cell - types of unit cells -	6
	electronic arrangement of silicon atom - intrinsic semiconductor -	

	extrinsic semiconductor – Description only. P-N junction diode - forward	
	bias - reverse bias. Solar cell - characteristics - description of short circuit	
	current, open circuit voltage, fill factor and efficiency - losses in solar	
	cells.	
	Growth of solar PV and silicon (Si) requirement - production of	9
	metallurgical grade (MGS) – production of electronic grade (EGS) –	
	Production of Si wafers: ingot making - monocrystalline - multicrystalline	
	- wafer dicing. Si sheets. Solar grade silicon (SoG) - refining processes	
	- Si usage in Solar PV. Process flow of commercial Si cell technology -	
	Description of saw damage removal and surface texturing, diffusion	
	process, thin-film layers for anti reflection coating and surface	
	passivation, metal contacts and their deposition.	
IV	PV Technologies, Applications	
	PV Technologies: Thin film Technologies - materials for thin film	6
	technologies – Thin film deposition techniques: Physical vapour	
	deposition – Evaporation – Sputtering. Chemical vapour deposition –	
	Low pressure - plasma enhanced. Advantages of thin film Si solar cell	
	technologies. Solar cell structures – substrate arrangement – superstrate	
	arrangement. Solar PV module: series and parallel connections of cells –	3
	mismatch in cell / module- Design and structure of PV module.	
	Batteries for PV systems – factors affecting battery performance – DC to	5
	DC converters - Charge controllers - DC to AC converter (inverter)	
	(Description only).	
	Applications: Flat plate collector - concentrating solar collectors - solar	
	pond – solar water heating – space heating and cooling – solar pumping	
	<ul> <li>solar cooking – solar green house. principle and applications only</li> </ul>	
V	Energy conservation	14
	Energy conservation act 2001 - Power of state government to facilitate	
	and enforce efficient use of energy and its conservation - Finance,	
	Accounts and Audit of bureau - Penalties and Adjudication - Appellate	
	tribunal for energy conservation - Energy Conservation Guidelines for	
	Industries by BEE, Govt of India - Guide lines – heating, cooling and heat	

transfer – waste recovery and usage – conversion of heat to electricity – Prevention of energy loss due to heat radiation and electric resistance – Industry energy management system. Net-metering policies – Tamil Nadu Energy Development Agencies – Projects in Tami Nadu: Solar energy, Bio energy and Wind energy – Tamil Nadu Solar policy 2019.

#### (Implemented from the Academic year 2020 - 2021 onwards)

- Course Name : Diploma in Mechatronics Engineering / Electronics (Robotics) Engineering
- Subject Code : 4047540
- Semester : V Semester

Subject Title : Industrial Automation Practical

#### TEACHING AND SCHEME OF EXAMINATION

No of weeks per semester: 16 weeks

	Instructions		Examination			
Subject	Hours /	Hours /		Marks		
	Week Semester		Internal Assessment	Board Examinations	Total	Duration
Industrial Automation Practical	5	80	25	100*	100	3 Hrs.

\* Examinations will be conducted for 100 marks and it will be reduced to 75 marks.

#### RATIONALE

To impart practical knowledge to the diploma students, practical subjects are introduced for every corresponding theory subject. This practical supports the aim and objective of Industrial automation.

#### **OBJECTIVES:**

On completion of the following syllabus contents, the students must be able to

- Study basic pneumatic system and it's functioning.
- Study basic hydraulic system and it's functioning.
- Design application oriented pneumatic circuits.
- Design of application oriented hydraulic system.

- Study the operation and use of special purpose values.
- Compare working of directional control valves.
- Trouble shoots in pneumatic and hydraulic circuits.
- Develop and test PLC ladder logic diagram

## 4047540 INDUSTRIAL AUTOMATION PRACTICAL DETAILED SYLLABUS

Contents: Practical

#### Name of the Topics:

#### LIST OF EXPERIMENTS

#### PNEUMATICS LAB

- 1. a. Direct operation of a single Acting cylinder.
  - b. Direct operation of Double Acting cylinder.
- 2. Operations of Single and double Acting Cylinder controlled from two different positions using shuttle valve / quick exhaust valve.
- 3. Speed control of Double Acting cylinder using metering in and metering out circuit.
- 4. Automatic operation of Double Acting cylinder in multi cycles -Using limit switches and memory valves.

#### HYDRAULICS LAB

- 5. a. Direct operation of Double Acting cylinder.
  - b. Direct operation of Hydraulic Motor.
- 6. a. Speed control of Double Acting cylinder Using metering-in and metering-out control.
  - b. Speed control Hydraulic Motor Using metering-in and metering-out control.
- 7. Automatic operation of two Double Acting cylinder in following sequencing using Pressure sequence valve
- 8. Operation of a Double Acting cylinder using solenoid operated Directional control valve.

#### PLC LAB

9. a. Direct operation of a Pneumatic cylinder using solenoid valve and latch circuit.

- b. Direct operation of a hydraulic cylinder using solenoid valve and latch circuit.
- 10. a. Operation of a pneumatic/hydraulic cylinder using AND logic control.
  - b. Operation of a pneumatic/hydraulic cylinder using OR logic control.
- 11. a. On-delay timer control of pneumatic/hydraulic cylinder

b. Off-delay timer control of pneumatic/hydraulic cylinder.

12. Automatic operation of Two Double Acting pneumatic cylinder in multi cycles Using proximities in the following sequence

i.) A+B+A-B ii). A-B+A+B

- 13. Wire and test the sequential operation of solenoid valve and a motor for tank filling operation using PLC.
- 14. Develop and execute the ladder logic to interface PLC with conveyor model for counting the object moving in the conveyer.

#### SCHEME OF VALUATION

SI. No	Name of the Activity	Mark Allocation
1.	Circuit Diagram	25
2.	Connection & Procedure	30
3.	Simulation / Execution and Troubleshooting	25
4.	Result	10
5.	Viva Voce	10
	Total	100

#### **Equipment Requirements**

SI. No	Name of the Equipments	Range / Specification	Required Quantity
1.	Basic Pneumatic Trainer Kit	-	2 No's
2.	Electro Pneumatic trainer kit	-	1 No
3.	Basic Hydraulic Trainer Kit	-	2 No's
4.	Electro Hydraulic trainer kit	-	1 No
5.	PLC Module	Any make	5 No's
6.	Conveyor module	-	1 No
7.	Water pump control kit	-	1 No

#### RATIONALE

To impart practical knowledge to the diploma students, practical subjects are introduced for every corresponding theory subject. This practical supports the aim and objective of Robotics.

#### OBJECTIVES

On completion of the following syllabus contents, the students must be able to

- Identify different part of robot
- Record positions using Cartesian co ordinate and joint co ordinates
- Write programmers for pick and place
- Operate and control robot through teach pendant
- Operate and control robot through programming
- Study and use vision system in robot application

### 4047550 ROBOTICS PRACTICAL

#### **DETAILED SYLLABUS**

#### Contents: Practical

#### LIST OF EXPERIMENTS

- 1. Robot system connection and component recognition
- 2. Robot operation, moving the various axis continuous and intermittent motions.
- 3. Writing program off-line/on line
  - a. Homing operation
  - b. Recording position
- 4. Program for operating the gripper using offline/online
- 5 Program for pick and place the object using online/offline
- 6 Program for stacking the object using offline/online
- 7. Write a Looping program using offline/online.
- 8. Teaching positions via XYZ co-ordinates
- 9. Write a Program using XYZ Coordinates
- 10. Write a program using wait, speed commands
- 11. Measurement of Robot work envelope
- 12. Measurement of Robot of motion
- 13. Measurement of Repeatability
- 14. Test the line follower robotic principle using IR sensors and DC motor without controller

#### EQUIPMENT REQUIREMENTS

SI. No	Name of the Equipments	Required Quantity
1.	ROBOT OFF LINE SIMULATION SOFTWARE	10 USERS
2.	SIX AXIS ROBOT	1 No
3.	COMPUTERS	10 No's
4.	LINE FOLLOWER KIT	2 No's

#### SCHEME OF VALUATION

#### **OBJECTIVES:**

At the end of the course the students will be able to

- \* Analyze the given problem
- \* Think the logic to solve the problem
- \* Understand the concepts of constants, variables, data types and operators.
- \* Develop programs using input and output operations, arithmetic and logic expressions, decision making statements and looping statements
- \* Proficient to write programs using arrays.
- \* Write Programs using string handling functions
- \* Write programs using user-defined functions

## 4047564 C PROGRAMMING LANGUAGE PRACTICAL DETAILED SYLLABUS

#### Contents: Practical

#### List of Exercises

- 1. Program to calculate simple and compound interest
- Program to find the gross salary and net salary of an employee having basic pay, hra, da, ma and income tax. Assume da is 20% of basic pay and income tax is 10% of gross salary.
- 3. Program to find whether the given number is a positive number, negative number or zero.
- 4. Program to find the largest and smallest among the three given numbers.
- 5. Program to read a numeric month and display it in words.
- 6. Programs to find the sum of series using while, do...while and for loop statements.
- 7. Programs to find the factorial of a given number using while, do...while and for loop statements.
- 8. Program to print multiplication table
- 9. Program to find the sum of digits of a given number
- 10. Program to implement Fibonacci series.
- 11. Program to sort a list of numbers
- 12. Program to sort the strings.
- 13. Program to add two matrices.
- 14. Write a function to find the factorial of a value. Write a program to find the nCr value using the above function.

## RATIONALE:

- The advent of Thyristors has revolutionized art of Electric Power Conversation and its Control.
- The use of the Power Electronic Devices has pervaded the Industrial Applications relating to the field of Electrical, Electronics, Instrumentation and Control Engineering.
- This Subject is introduced to impart practical skills to the Students in using some important Power Electronic Devices and Circuits.

## **OBJECTIVES:**

## At the end of the Course, Students will be able to:

• Construct and test various Triggering Circuits for SCR.

- Construct and test different types of Phase Controlled Converters in various configurations at different load conditions.
- Construct and observe the performance of different types of Chopper and Inverters.
- Construct and test the performance of Open Loop and Closed Loop Control of DC and AC drives.
- Construct and test the performance of Single Phase Cyclo Converter.

## .DETAILED SYLLABUS

**Contents: Practical** 

## Name of the Topics: Power Electronics and Drives Practical

## Exercise

- 1. Construct the Line synchronized Ramp trigger circuit using UJT with AC Load to measure Firing Angles.
- Construct Lamp control circuit using DIAC TRIAC to measure various output voltage for Firing Angles.
- 3. Construct and test the SCR Commutation Circuits (Class B & ClassD)
- 4. Construct and test the Half Wave Controlled Rectifier with R-Load, RL Load
- 5. Construct and test the Single Phase Fully Controlled Bridge with RL-Load and Free Wheeling Diode.
- 6. Construct and test the Single Phase Semi Controlled Bridge with R-Load
- 7. Construct and test the DC Chopper Control Circuit using Thyristor (any class).
- 8. Construct and test the Step Up Chopper.
- 9. Construct PWM based Step Down DC Chopper using MOSFET/IGBT.
- 10.Construct and test the Single Phase Single Pulse / Sinusoidal PWM Inverter using MOSFET/IGBT.
- 11. Construct and test the SMPS using MOSFET/IGBT.
- 12. Construct and test the Control Circuit using TRIAC for Universal Motor.
- 13. Construct and test the Single Phase to Single Phase Cyclo Converter.

## LISTOFEQUIPMENTS

S.NO	NAMEOF THEEQUIPMENT	NO OF QUANTITY
1.	Line Synchronized Ramp Trigger Circuit Using UJT Trainer Kit.	1
2.	Lamp Control Circuit Using DIAC – TRIAC Trainer Kit.	1

## (Implemented from the Academic year 2020 - 2021 onwards)

- Course Name : 1020 Diploma in Mechanical Engineering
- Subject Code : 4020562
- Semester : V

Subject Title : Green Energy and Energy Conservation Practical

### TEACHING AND SCHEME OF EXAMINATION

No of weeks per semester: 16 weeks

Subject	Instructions			Examination		
4020562	Haura	Heure /		Marks		
Green Energy and Energy Conservation	Hours / Week	Hours / Semester	Internal Assessment	Board Examinations	Total	Duration
Practical	4	64	25	100*	100	3 Hrs.

\* Examinations will be conducted for 100 marks and it will be reduced to 75 marks for result.

## **Objectives:**

- To demonstrate the I-V and P-V Characteristics of PV module .
- To show the effect of variation in tilt angle on PV module power.
- To study the characteristics of battery.
- To understand how a solar PV standalone system works
- To workout power flow calculations of standalone PV system AC load DC load with battery.
- To understand how to use various electrical measuring equipments.
- To study the different electrical parameters of a monocrystalline and polycrystalline silicon solar panel
- To study the effect of shading on the output of solar panel.
- To understand and determine the power flow in a solar DC system.

## 4020562 GREEN ENERGY AND ENERGY CONSERVATION PRACTICAL

## DETAILED SYLLABUS

### Experiments

## PART A

- 1. Study and demonstrate the I-V and P-V Characteristics of PV module with varying radiation and temperature level.
- 2. Study and demonstrate the I-V and P-V characteristics of series and parallel combination of PV modules.
- 3. Study and demonstrate the effect of shading on module output power.
- 4. Do a shading analysis on the site where solar PV system needs to be setup.
- 5. Study the wind power generation status in Tamilnadu.
- 6. Study the biogas generation status in Tamilnadu.

## PART B

- 1. Conduct experiment to show the effect of variation in tilt angle on PV module power.
- 2. Conduct the experiment to demonstrate the working of diode as Bypass diode and blocking diode.
- 3. Conduct the experiment to draw the charging and discharging characteristics of battery.
- Conduct the experiment for the power flow calculations of standalone PV system of AC load with battery.
- Conduct the experiment for the power flow calculations of standalone PV system of DC load with battery.
- 6. Conduct the experiment to determine the different electrical parameters of a monocrystalline and polycrystalline silicon solar panel.

## **BOARD EXAMINATION**

Note:

- All the experiments in both sections should be completed. Two experiments will be given for examination by selecting one from PART A and one from PART B.
- All the experiments should be given in the question paper and students are allowed to select by a lot or Question paper issued from the DOTE should be followed.
- All regular students appearing for first attempt should submit record notebook for the examination.
- The external examiner should verify the availability of the facility for the batch strength before commencement of practical examination.
- The external examiner should verify the working condition of machinery's / equipment before commencement of practical examination.

### RATIONALE:

Development of a diploma curriculum is a dynamic process responsive to the society and reflecting the needs and aspiration of its learners. Fast changing society deserves changes in educational curriculum particularly to establish relevance to emerging socioeconomic environments; to ensure equity of opportunity and participation and finally promoting concern for excellence. In this context the course on entrepreneurship and start ups aims at instilling and stimulating human urge for excellence by realizing individual potential for generating and putting to use the inputs, relevant to social prosperity and thereby ensure good means of living for every individual, provides jobs and develop Indian economy.

#### **OBJECTIVES:**

At the end of the study of 5<sup>th</sup> semester the students will be able to

- To excite the students about entrepreneurship
- Acquiring Entrepreneurial spirit and resourcefulness
- Understanding the concept and process of entrepreneurship
- Acquiring entrepreneurial quality, competency and motivation
- Learning the process and skills of creation and management of entrepreneurial venture
- Familiarization with various uses of human resource for earning dignified means of living
- Know its contribution in and role in the growth and development of individual and the nation
- Understand the formation of E-cell
- Survey and analyze the market to understand customer needs
- o Understand the importance of generation of ideas and product selection
- Learn the preparation of project feasibility report
- Understand the importance of sales and turnover
- o Familiarization of various financial and non financial schemes
- Aware the concept of incubation and starts ups

## 4020570 ENTREPRENEURSHIP & STARTUP DETAILED SYLLABUS

Unit	Name of the Topics	Hours
1	ENTREPRENEURSHIP – INTRODUCTION AND PROCESS	10
	Concept, Functions and Importance	
	Myths about Entrepreneurship	
	<ul> <li>Pros and Cons of Entrepreneurship</li> </ul>	
	Process of Entrepreneurship	
	Benefits of Entrepreneur	
	Competencies and Characteristics	
	Ethical Entrepreneurship	
	Entrepreneurial Values and Attitudes	
	Motivation	
	Creativity	
	Innovation	
	Entrepreneurs - as problem solvers	
	<ul> <li>Mindset of an employee and an entrepreneur</li> </ul>	
	<ul> <li>Business Failure – causes and remedies</li> </ul>	
	Role of Networking in entrepreneurship	
2	BUSINESS IDEA AND BANKING	10
	<ul> <li>Types of Business: Manufacturing, Trading and Services</li> </ul>	
	Stakeholders: Sellers, Vendors and Consumers	
	E- Commerce Business Models	
	Types of Resources - Human, Capital and Entrepreneurial tools	
	<ul> <li>Goals of Business and Goal Setting</li> </ul>	
	<ul> <li>Patent, copyright and Intellectual Property Rights</li> </ul>	
	<ul> <li>Negotiations - Importance and methods</li> </ul>	
	Customer Relations and Vendor Management	
	Size and Capital based classification of business enterprises	

	Dala of Financial Institutions	
	Role of Financial Institutions	
	Role of Government policy	
	Entrepreneurial support systems	
	Incentive schemes for State Government	
	<ul> <li>Incentive schemes for Central Government</li> </ul>	
3	STARTUPS, E-CELL AND SUCCESS STORIES	10
	Concept of Incubation centre's	
	<ul> <li>Activities of DIC, financial institutions and other relevance</li> </ul>	
	institutions	
	<ul> <li>Success stories of Indian and global business legends</li> </ul>	
	Field Visit to MSME's	
	Various sources of Information	
	Learn to earn	
	Startup and its stages	
	<ul> <li>Role of Technology – E-commerce and Social Media</li> </ul>	
	Role of E-Cell	
	E-Cell to Entrepreneurship	
4	PRICING AND COST ANALYSIS	10
	Calculation of Unit of Sale, Unit Price and Unit Cost	
	<ul> <li>Types of Costs - Variable and Fixed, Operational Costs</li> </ul>	
	Break Even Analysis	
	<ul> <li>Understand the meaning and concept of the term Cash Inflow</li> </ul>	
	and Cash Outflow	
	Prepare a Cash Flow Projection	
	<ul> <li>Pricing and Factors affecting pricing</li> </ul>	
	Understand the importance and preparation of Income Statement	
	<ul> <li>Launch Strategies after pricing and proof of concept</li> </ul>	
	<ul> <li>Branding - Business name, logo, tag line</li> </ul>	
	Promotion strategy	

5	BUSINESS PLAN PREPARATION	10
	<ul><li>Generation of Ideas,</li><li>Business Ideas vs. Business Opportunities</li></ul>	
	Selecting the Right Opportunity	
	Product selection	
	<ul> <li>New product development and analysis</li> </ul>	
	Feasibility Study Report – Technical analysis, financial analysis	
	and commercial analysis	
	<ul> <li>Market Research - Concept, Importance and Process</li> </ul>	
	<ul> <li>Marketing and Sales strategy</li> </ul>	
	Digital marketing	
	Social Entrepreneurship	
	Risk Taking-Concept	
	Types of business risks

#### **Board Examination – Evaluation Pattern**

#### Internal Mark Allocation

Assignment (Theory portion)*	-	10
Seminar Presentation	-	10
Attendance	-	5
Total	-	25

# Note: \* Two assignments should be submitted. The same must be evaluated and converted to 10 marks.

#### Guidelines for assignment:

First assignment	– Unit I
Second assignment	– Unit II
Guidelines for Seminar Presentation	- Unit III

Each assignment should have five three marks questions and two five marks questions.

## **BOARD EXAMINATION**

#### Note

- 1. The students should be taught all units and proper exposure and field visit also arranged. All the portions should be completed before examinations.
- The students should maintain theory assignment and seminar presentation. The assignment and seminar presentation should be submitted during the Board Practical Examinations.
- 3. The question paper consists of theory and practical portions. All students should write the answers for theory questions (45 Marks) and practical

portions (55 Marks) should be completed for board examinations.

- 4. All exercises should be given in the question paper and students are allowed to select by lot. If required the dimensions of the exercises may be varied for every batch. No fixed time allotted for each portion and students have liberty to do the examination for 3Hrs.
- For Written Examination: theory question and answer: 45 Marks Ten questions will be asked for 3 marks each. Five questions from each unit 1 & 2. (10 X 3 = 30).

Three questions will be asked for 5 marks each. One question from each unit 1, 2 & 3.  $(3 \times 5 = 15)$ 

 For Practical Examination: The business plan/Feasibility report or Report on Unit 4 & 5 should be submitted during the board practical examinations. The same have to be evaluated for the report submission (40 marks).

SI. No	Description	Marks
Part A	Written Examination - Theory Question and answer 10 questions x 3 marks = 30 marks 3 questions x 5 marks = 15 marks	45
Part B	Practical Examination – Submission on Business Plan/Feasibility Report or Report on Unit 4 & 5	40
Part C	Viva voce	15
	Total	100

## **DETAILED ALLOCATION OF MARKS**

## DEPARTMENT OF ELECTRONICS (ROBOTICS) / MECHATRONICS ENGINEERING

# III YEAR

## **N SCHEME**

# **VI SEMESTER**

2020-21 onwards

## INDUSTRIAL ENGINEERING AND MANAGEMENT

(Common with Mechanical Engg)

**CURRICULUM DEVELOPMENT CENTRE** 

## ANNEXURE- III

## STATE BOARD OF TECHNICAL EDUCATION &TRAINING, TAMILNADU DIPLOMA IN ENGINEERING / TECHNOLOGY SYLLABUS N - SCHEME

(To be implemented for the students admitted from the year 2020 - 2021 onwards)

- Course Name : 1020 Diploma in Mechanical Engineering
- Subject Code : 4020610
- Semester : VI
- Subject Title : Industrial Engineering and Management

#### **TEACHING AND SCHEME OF EXAMINATION**

No of weeks per semester: 16 weeks

Subj	ect	Instr	uctions		Examinatio	n	
4020	610	Hours	Hours /		Marks		
Indus		/ Week	Semester	Internal	Board	Total	Duration
Engineer	ing and	/ Week	Jemester	Assessment	Examinations	Total	
Manage	ement	6	96	25	100*	100	3 Hrs.

\* Examinations will be conducted for 100 marks and it will be reduced to 75 marks for result.

### **Topics and Allocation of Hours:**

Unit No	Topics	Hours
I	Plant Engineering and Plant Safety	18
	Work Study, Method Study and WorkMeasurement	18
	Principles, Personnel Management and Organizatioal	19
	Behavior:	
IV	Financial and Material Management	18
V	Engineering Ethics and Human Values	16
TEST AN	DREVISION	07
	Total	96

## RATIONALE:

In the Indian Economy, Industries and Enterprises always find prominent place. After globalization, the students should be trained not only in manufacturing process but also in managing activities of industries. The knowledge about plant, safety, work study techniques, personnel management, financial management and engineering ethics and human values will definitely help the students as managers to suit the industries.

## **OBJECTIVES:**

- To study the different types of layout.
- To study the safety aspects and its impacts on an organization.
- To study different work measurement techniques.
- To study engineering ethics and human values.
- To study the staff selection procedure and training of them.
- To study capital and resources of capital.
- To study inventory control system.
- To study about organization and it's behavior.

# 4020610 INDUSTRIAL ENGINEERING AND MANAGEMENT **DETAILED SYLLABUS**

## **Contents: Theory**

Unit	Name of the Topics	Time
I	Plant Engineering and Plant Safety	
	<b><u>Chapter: 1.1:</u>Plant Engineering :</b> Plant – Selection of site of industry –	9
	Plant layout - Principles of a good layout - types - process, product	
	and fixed position - techniques to improve layout - Principles of	
	material handling equipment – Plantmaintenance – importance – Break	
	down maintenance, preventive maintenance and scheduled	
	maintenance.	
	Chapter: 1.2: Plant Safety: Importance -accident-causes and	9

	cost of an accident-accident proneness-prevention of accidents-	
	Industrial disputes-settlement of Industrial disputes-Collective	
	bargaining, conciliation, Mediation, arbitration-Indian Factories Act 1948	
	and its provisions related to health, welfare and safety.	
II	Work Study, Method Study and Work Measurement	
	Chapter: 2.1: Work Study: Productivity – Standard of living – method	4
	of improving productivity - Objectives - Importance of good working	
	conditions.	
	Chapter: 2.2: Method Study: Definition - Objectives - Selection of	6
	a job for method study -Basic procedure for conduct of method	
	study - Tools used - Operation process chart, Flow process chart,	
	two handed process chart, Man Machine chart, String diagram and	
	flow diagram.	
	Chapter: 2.3:Work Measurement: Definition - Basic procedure in	8
	making a time study - Employees rating factor - Application of time	
	allowances – Rest, Personal, Process, Special and Policy allowances –	
	Calculation of standard time - Problems - Basic concept of production	
	study – Techniques of work measurement-Ratio delay study, Synthesis	
	from standard data, analytical estimating and Pre determined Motion	
	Time System (PMTS).	
- 111	Principles, Personnel Management and Organizational Behavior:	
	Chapter: 3.1:Principles of Management: Definition of management –	7
	Administration - Organization - F.W. Taylor's and Henry Fayol's	
	Principles of Management – Functions of Manager – Directing –	
	Leadership –Types of Leadership – Qualities of a good leader –	
	Motivation – Positive and negative motivationModern management	
	techniques- Management Information Systems – Strategic	
	management – SWOT Analysis - Business Process Re-engineering	
	(BPR) – Enterprises Resource Planning (ERP) –Activity Based	
	Management (ABM) - Global Perspective - Principles and brief	
	description.	
	Chapter: 3.2: Personnel Management: Responsibility of human	7

	resource management - Selection procedure - Training of workers	
	- Apprentice training - On the job training and vestibule school	
	training – Job evaluation and merit rating – objectives and	
	importance – wages and salary administration – Components of wages	
	<ul> <li>Wage fixation – Type of wage payment – Halsey's 50% plan,</li> </ul>	
	Rowan's plan and Emerson's efficiency plan – Problems.	
	Chapter: 3.3: Organizational behavior: Definition – organization	5
	Types of Organization – Line, Staff, Taylor's Pure functional types –	
	Line and staff and committee type –Organizational Approaches,	
	individual behavior - causes - Environmental effect - Behavior and	
	Performance, Perception - organizational implications.	
IV	Financial and Material Management	
	Chapter: 4.1:Financial Management:Fixed and working capital -	9
	Resources of capital – shares preference and equity shares –	
	debentures – Type of debentures – Public deposits, Factory costing –	
	direct cost – indirect cost – Factory overhead – Selling price of a	
	product – Profit – Problems. Depreciation – Causes – Methods -	
	Straight line, sinking fund and percentage on diminishing value method	
	– Problems.	
	Chapter: 4.2:Material Management: Objectives of good stock control	9
	system – ABC analysis of inventory – Procurement and consumption	
	cycle – Minimum Stock, Lead Time, Reorder Level - Economic order	
	quantity - problems – supply chain management - Introduction –	
	Purchasing procedure – Store keeping – Bin card.	
V	Engineering Ethics and Human Values	
	Chapter: 5.1: Engineering Ethics: Definition-engineering ethics-	9
	personal and business ethics- duties and rights-engineering as a	
	profession - core qualities of professional practitioners-environment and	
	their impact-code of ethics- procedure for solving ethical conflicts -	
	ethical judgement- Kohiberg's stages of moral development - value	
	based ethics- engineers as managers, consultants and leaders-	
	environmental ethics- computer ethics- Intellectual Property Rights	

## (IPRs).

<u>Chapter: 5.2:</u>Human values : morals – values – integrity- service learning-civic virtue - respect for others- living peacefully- caring – sharing – honesty- courage - valuing time cooperation - commitments – empathy- selfconfidence – character- stress management.

7

## DEPARTMENT OF ELECTRONICS (ROBOTICS) / MECHATRONICS ENGINEERING

# III YEAR

## **N SCHEME**

# **VI SEMESTER**

2020-21 onwards

# COMPUTER INTEGRATED MANUFACTURING

**CURRICULUM DEVELOPMENT CENTRE** 

## ANNEXURE- III STATE BOARD OF TECHNICAL EDUCATION &TRAINING, TAMILNADU DIPLOMA IN ENGINEERING / TECHNOLOGY SYLLABUS

### N-SCHEME

## (Implemented from the Academic year 2020 - 2021 onwards)

Course Name : Diploma in Mechatronics Engineering / Electronics (Robotics) Engineering

- Subject Code : 4047620
- Semester : VI Semester

Subject Title : Computer Intergrated Manufacturing

## TEACHING AND SCHEME OF EXAMINATION

No of weeks per semester: 16 weeks

	Instructions		Examination			
Subject	Hours /	Hours /		Marks		
	Week	Semester	Internal Assessment	Board Examinations	Total	Duration
Computer Integrated Manufacturing	5	80	25	100*	100	3 Hrs.

\* Examinations will be conducted for 100 marks and it will be reduced to 75 marks.

## **Topics and Allocation of Hours**

UNIT	Торіс	Hrs.
I	Introduction to CIM and Computer Aided Design & Analysis	15
П	Computer Aided Manufacturing and Rapid Prototyping	15
	CNC Machine and Components	15
IV	Part Programming	14
V	FMS, Integrated Material Handling	14
	Test & Model Exam	7
	Total	80

## RATIONALE:

As per the latest requirements in the industries, This enables to learn the assistance of computer in the field of design and manufacturing areas. The application of material handling equipment is learnt based on the automation in the industries.

## **OBJECTIVES:**

On completion of the following syllabus contents, the students must be able to

- Understand the concept and requirement of the integration of the design and manufacturing.
- Acquire knowledge about the computer assistance in the design processand analysis.
- Understand the concepts of manufacturing with computer assistance in the shop floor.
- Learn the principle and working of the CNC machines.
- Understand the principle of latest manufacturing machines like EDM and RPT.
- Learn the method of CNC programming with international codes.
- Acquire the knowledge in the material handling equipment.

## 4047620 COMPUTER INTERGRATED MANUFACTURING DETAILED SYLLABUS

### Contents: Theory

Unit	Name of the Topics	Hours
I	INTRODUCTION TO CIM AND COMPUTER AIDED DESIGN &	
	ANALYSIS	
	Chapter 1.1 CIM: Introduction of CIM - concept of CIM - evolution of	3
	CIM – CIM wheel – Benefits – integrated CAD/CAM.	
	Chapter 1.2 CAD: Computer Aided Design – Introduction – CAD	5
	definition – Shigley's design process – CAD activities – benefits of CAD.	
	Types of CAD system – Host and terminal based CAD system - PC	
	based CAD system - workstation based CAD system - graphics	

	workstation – CAD software packages. 2D&3D transformations –	
	translation, scaling, rotation and concatenation.	
	Chapter 1.3 Geometric modeling: Techniques: Wire frame modeling –	4
	surface modeling -solid modeling: Boundary representation -	
	Constructive Solid Geometry-Comparison.	
	Graphics standard – Definition –Need - GKS – IGES – PHIGS – DXF.	
	Chapter 1.4 Finite Element Analysis: Introduction – Development -	3
	Basic steps – Advantage.	
	COMPUTER AIDED MANUFACTURING AND RAPID PROTOTYPING	
	Chapter 2.1 CAM: Definition – functions of CAM – benefits of CAM –	4
	Group technology – Part families - Parts classification and coding -	
	coding structure – Optiz system, MICLASS system and CODE System -	
	process planning	
	Chapter 2.2 CAPP: – Types of CAPP : Variant type, Generative type –	6
	advantages of CAPP - production planning and control –	
	computer integrated production management system – Master	
	Production Schedule (MPS) – Capacity planning – Materials	
	Requirement Planning (MRP)-Manufacturing Resources Planning	
	(MRP-II)- Shop floor control system - Just in time manufacturing	
	philosophy- Introduction to enterprises resources planning.	
	Chapter 2.3 Rapid proto typing: concept and applications – materials –	5
	types - Stereo lithography (STL) – selective laser sintering(SLS) – Fused	
	Deposition Modeling (FDM) - 3D printing.	
	CNC MACHINE AND COMPONENTS	
	Chapter 3.1 CNC Machines: Numerical control - definition -	6
	components of NC systems - development of NC - DNC - Adaptive	
	control systems – working principle of a CNC system – Features of CNC	
	machines - advantage of CNC machines - difference between NC and	
	CNC - Construction and working principle of turning centre -	
	Construction and working principle of machining centers – machine axes	
	conventions turning centre and machining centre – design considerations	

	of NC machine tools	
		٨
	Chapter 3.2 CNC EDM machine – Working principle of die sinking and	4
	wire EDM machines - Coordinate Measuring Machines: construction and	
	working principles.	_
	Chapter 3.3 Components of CNC machine Drives: spindle drive – dc	5
	motor – Feed drives – dc servo motor and stepper motor – hydraulic	
	systems – Slide ways – requirement – types – friction slide ways and anti	
	friction slide ways - linear motion bearings - recirculation ball screw -	
	ATC – tool magazine – feedback devices – linear and rotary transducers	
	<ul> <li>Encoders - in process probing</li> </ul>	
IV	PART PROGRAMMING:	
	Chapter 4.1 NC part programming – methods - manual programming–	8
	coordinate system - types of motion control: point-to-point, paraxial and	
	contouring - Datum points: machine zero, work zero, tool zero NC	
	dimensioning - reference points - tool material - tool inserts - tool offsets	
	and compensation - NC dimensioning - preparatory functions and G	
	codes, miscellaneous functions and M codesinterpolation: linear	
	interpolation and circular interpolation - CNC program procedure.	
	Chapter 4.2 Part Program – macro – sub-program – canned cycles:	6
	stock – mirror images – thread cutting – Sample programs for lathe :	
	Linear and circular interpolation - Stock removal turning – Peck drilling –	
	Thread cutting and Sample programs for milling: Linear and circular	
	interpolation – mirroring – sub program – drilling cycle – pocketing	
V	FMS, AGV, INTEGRATED MATERIAL HANDLING AND INDUSTRY4.0	
	Chapter 5.1 FMS - Types of manufacturing - introduction to FMS – FMS	6
	components – FMS layouts – Types of FMS: flexible manufacturing cell –	
	flexible turning cell – flexible transfer line – flexible machining systems –	
	benefits of FMS - introduction to intelligent manufacturing system -	
	virtual machining.	
	<b>Chapter 5.2 AGV</b> - Computer Integrated material handling – AGV:	4
	working principle – types - benefits – Automatic Storage and Retrieval	

Systems (ASRS).	
Augmented reality(AR)	
Chapter 5.3 Industry 4.0: -various industrial revolution - Artificial	4
Intelligence-Internet of things(IOT) - Industrial internet of things(IIOT) -	
smart manufacturing – Big data

Total		80

## RATIONALE:

In process industries, controllers are used in controlling temperature, pressure, flow, liquid level, and other process variables. This is provided to get necessary knowledge that may help the students getting employed in process industries

## **OBJECTIVES:**

On completion of the following syllabus contents, the students must be able to

- Study the basic concepts of process control variables
- Interpret the characteristics of processes and propose the suitable control modes
- Examine the tuning of controllers
- Recommend the advanced control system for various process
- Choose the instrumentation to control the process
- Measurement technique of strain, force torque and power
- Measurement technique of pressure, temperature and flow.

## 4047631 PROCESS CONTROL

## **DETAILED SYLLABUS**

### Contents: Theory

Unit	Name of the Topics	Hours
I	SIMPLE PROCESS CONTROL SYSTEMS AND TERMINOLOGY	
	1.1 Definition – Process Control – Functional block diagram of an	7
	Automatic process control system - Need for Automatic process control	
	in industry -Terminology used in control system : Set point – Measured	
	variable – Comparator – Error – Controller – Final control element.	
	Controlled variable – Manipulated variable – disturbances	
	1.2 Automatic control system- significance - Advantages of Automatic	0
	control system -Mathematical Modeling of Processes - First order	8
	process systems - level, temperature and pressure - Self Regulation -	
	Capacitance and Capacity. Piping and Instrumentation flow diagram for	
	the above system	

II	CONTROLLER PRINCIPLES	
	2.1 Controller – Block diagram, Types, General properties – Reverse and	8
	Direct action, Controller modes – Discontinuous – On – Off Control with	
	differential gap, without differential gap - Neutral zone- Continuous -	
	Proportional controller - Proportional band (PB) - Effect of PB on a	
	controller output – Offset –Integral control – PI – PD – PID – Definition,	
	salient features, applications and limitations of the above controllers	
	2.2 Selection of control action – Electronic controllers – Error detector –	7
	Two position controller – P,I,D,PI,PD, PID controllers –reverse action –	,
	pneumatic controllers – Flapper – Nozzle mechanism, Pneumatic relay.	
	TUNING OF CONTROLLERS	
	3.1 Concept of tuning - Evaluation Criteria: Performance Criteria -	5
	Quarter decay ratio, IAE, ISE,ITAE	
	3.2 Methods of tuning – Open loop response method – Process reaction	0
	curve method -Closed loop response method - Ultimate cycle method,	9
	Damped oscillation method-Frequency response method of turning-Self	
	tuning controllers.	
IV	PROCESS INSTRUMENTATION AND FINAL CONTROL ELEMENTS	
	4.1 Signal converters – P to I Converter, I to P Converter – Actuators –	10
	Electrical, Pneumatic, Hydraulic and Electro pneumatic – Valve	
	Positioners – Control valve – Characteristics Quick opening, Linear, Equal	
	percentage - Control valve sizing - Cv rating - Selection of a control	
	valve – Effects of Cavitations and Flashing on control valve performance.	
	4.2 Introduction to transmitters, two wire and four wire transmitters,	F
	Smart and intelligent transmitters.	5
V	COMPLEX CONTROL SYSTEMS WITH MULTIPLE LOOPS	
	5.1 Advanced control systems- Cascade control system, Ratio control	8
	systems, feed forward control system- Selective control systems- split	

range control-adaptive control-Multi variable control-Comparison of	
feedback control system and feed forward control system. (One specific	
application for each of the above systems)	
5.2 Introduction DCS and SCADA Block Diagram of Fuzzy logic	6
controller – block diagram – typical application-washing machine	0

## RATIONALE:

Auto Electronics is introduced with the aim of providing necessary knowledge on automobiles that may help the students getting employed in automobile industry

### **OBJECTIVES:**

On completion of the following syllabus contents, the students must be able to

- Understand the basic concepts and components
- Understand different ignition systems
- Study about the lead acid battery, testing and lighting system
- Study the sensor based electronic engine management and control devices
- Study about Future Trends in Automobile Techniques

## 4047632 AUTO ELECTRONICS DETAILED SYLLABUS

### Contents: Theory

Unit	Name of the Topics	Hours				
I	Automobile components:					
	<b>1.1 Engine Components:</b> The engine-components- engine block,	5				
	cylinder, crank shaft, piston, cam shaft, valves, intake system, ignition,					
	exhaust, cooling system -Lubrication system					
	1.2 Engine Starting System: Fuel feed system ignition system- spark	5				
	plug- high voltage circuit and distribution- compression ignition system -					
	steering system, Ackerman steering mechanism. Suspension systems.					
	1.3 Fuel injection and Ignition system: Fuel injection-types-throttle	5				
	body versus port injection- Fuel injectors- different types High pressure					
	diesel fuel injection- Introduction to Electronic ignition system					
II	Storage Battery, Charging and Lighting System:					
	Chapter 2.1 Battery: Principle of lead acid cells, plates and their	4				
	characteristics, construction, electrolyte, effect of temperature on					
	electrolyte, specific gravity, capacity and efficiency					
	<b><u>Chapter 2.2 Charging system</u></b> : Methods of charging from D.C. mains,	4				
	defects and remedies of batteries, care of idle and new batteries.					

	Recycling Process - Recent developments - Procedure for charging	
	Chapter 2.3 Electrical actuators: D.C. Generators, Alternators -their	4
	Characteristics. Control, cut out, Electrical, Electro-mechanical and	
	electronic regulators.	
	Chapter 2.4 Lighting system: Details of head light and side light, LED	3
	lighting system, head light dazzling and preventive methods. Static and	
	Dynamic Bending lights	
	Sensors and Engine Management Systems	
	Chapter 3.1 Introduction to sensors and transducers -Types-Air flow	8
	rate sensor, Engine crankshaft angular position senor, Engine speed	
	sensor, Timing sensor, Throttle angle sensor Pressure sensor,	
	Temperature sensors, Pressure sensor- Flow sensor, Exhaust gas	
	oxygen sensors, Knock Sensor, Engine torque sensors, Automotive	
	engine control actuators, Exhaust gas recirculation actuator.	
	Chapter 3.2 Engine Management system:	7
	Electronic Engine Management System, Brake actuation warning	
	system, flash system, oil pressure warning system, engine over heat	
	warning system, air pressure warning system, speed warning system,	
	door lock indicators, neutral gear indicator, horn design, permanent	
	magnet horn, air & music horns. Wind shield wiper. Window washer,	
	electronic instruments, dash board illumination and MIL.	
IV	Automotive control and Safety systems :	
	Chapter 4.1 Automotive Control: Engine Control Objectives, Engine	5
	control functions, Fuel delivery systems, Electronic fuel Ignition	
	Systems– Emission control	
	Chapter 4.2 Automotive Transmission Control Systems :	5
	Cruise control system, Antilock braking system (ABS), Tire-slip control,	
	Active suspension, Traction control, Electronic Suspension system,	
	Steering control, Stability control, Integrated engine control.	
	Chapter 4.3 Safety System:	4
	Central locking, Air bags and seat belt tensioners - Voice warning	
	Contral looking; All bage and boat bolt tenerere veree warning	

V Recent trends in automobile technology	
Chapter 5.1 Electric Vehicle: Electrical and Hybrid Vehicles	s, 4
Introduction-Electric Vehicle development- system layout- basic system	n
components- Electric battery solar cells- Rapid charging system-Moto	or
drive system-fuel cell Electric vehicle- Hybrid vehicles- Parallel Hybrid	d
Vehicle-CNG Electric Hybrid Vehicle	
Chapter 5.2 Emission standards: Euro and Indian standards	2
Chapter 5.3 Vehicle Intelligence :Introduction – Base structure- Visio	on 4
based autonomous road vehicles- Architecture for vision system	۱-
Features- applicationsimage processing	
Chapter 5.4 Intelligent robot vehicles - obstacle detection, collision	n 4
warning and avoidance system -Blind spot detection-on board and c	ff
board diagnostics in automobiles-connected car technology- Automat	ic
climate control

DEPARTMENT OF ELECTRONICS (ROBOTICS) / MECHATRONICS ENGINEERING

# III YEAR

**N SCHEME** 

## **VI SEMESTER**

2020-21 onwards

## **EMBEDDED SYSTEMS**

(Common with Electronics and Communication Engg)

CURRICULUM DEVELOPMENT CENTRE

## ANNEXURE – III

## STATE BOARD OF TECHNICAL EDUCATION &TRAINING, TAMILNADU DIPLOMA IN ENGINEERING / TECHNOLOGY SYLLABUS N-SCHEME

(To be Implemented for the students admitted from the year 2020 - 2021 onwards)

Course Name : 1040 Electronics and Communication Engineering

- Subject Code : 4040633
- Semester : VI
- Subject Title : Embedded Systems

## **TEACHING AND SCHEME OF EXAMINATION**

No of weeks per semester: 16 weeks

	Instru	uctions	Examination			
Subject	Hours /	Hours /	Marks			
	Week	Semester	Internal Assessment	Board Examinations	Total	Duration
Embedded Systems	5	80	25	100*	100	3 Hrs.

\* Examination will be conducted for 100 marks and it will be reduced to 75 marks.

## **Topics and Allocation of Hours**

UNIT	Торіс	Hrs.		
I	I Introduction to Embedded systems and ARM processor			
II	ARM Instruction Set	16		
	LPC 2148 controller	16		
IV	LPC 2148 peripherals	15		
V	Operating System	10		
	Test & Model Exam			
	Total	80		

## RATIONALE:

This subject makes the students to understand the definition for Embedded Systems. It also enables the students to have the knowledge about the different architectures, RISC and CISC processors. This subject makes the students to understand about RTOS. To specific, the subject deals with ARM7 RISC processor and the on chip peripherals of LPC2148.

### **OBJECTIVES:**

On completion of the syllabus, the students must be able to

- -> Understand ARM7 processor .
- -> Understand the architecture of LPC 2148.
- -> Understand ARM7 instruction set.
- -> Understand the types of buses.
- -> Explain On chip peripherals.
- -> Have clear knowledge about RTOS concepts.

## 4040633 EMBEDDED SYSTEMS

## **DETAILED SYLLABUS**

Note: Bit level details in registers should not be asked in board theory examination.

Contents: Theory

Unit	Name of the Topics	Hours		
I	Introduction to Embedded Systems and ARM Processor			
	1.1 : Embedded Systems			
	Definition of Embedded System - Features of Embedded System -			
	Types of Embedded System – List of Embedded System Devices-			
	Harvard and Von-Neumann architectures-RISC and CISC Processors.			
	1.2:ARM Processor Architecture Fundamentals			
	Block diagram of ARM based embedded system with hardware			
	components - Pipeline-Data Flow Model-CPU registers - Modes of			
	Operation – PSW -Processor State and Instruction Set-Exceptions-			
	Interrupts-Vector table-Little Endian and Big Endian.			

II	ARM Instruction Set	12			
	2.1:Instruction Set				
	ARM state instruction set- Thumb State Instruction sets(Brief				
	introduction only)-Data processing instructions-Branch instructions-				
	Load-store instructions-Software interrupt instruction-Program status				
	register instructions-stack instructions-Conditional execution.				
	2.2:Simple programs				
	Addition, Subtraction and Multiplication using ARM processor assembly	4			
	language.				
	LPC 2148 Controller				
	3.1:Introduction to LPC 2148 ARM controller	8			
	LPC 2148 ARM Controller – Features-Block diagram – Memory and on				
	chip peripheral devices – ARM 7 TDMI-S Nomenclature– Memory Map –				
	Memory re-map and boot block-Types of buses.				
	3.2:System control functions				
	Crystal oscillator-PLL-Power control-RESET-VPB Divider-Wakeup timer-				
	Vector Interrupt controller-(VIC)-Register description-External Interrupts.				
IV	LPC 2148 Peripherals				
	4.1:Peripherals				
	Pin connect block-Features-pin connect block register description-GPIO	10			
	(Slow)- Features-register description Timer/Counter – Block diagram –				
	Register descriptionPWM-features-register description-ADC -features-				
	register description-DAC-features-register description.				
	4.2:Serial communication in LPC 2148	5			
	UART features – UART0 Block diagram—UART0 register description.				
V	Operating System	10			
	5.1:Embedded OS and RTOS				
	Introduction to OSFunctions of OS-Embedded OS-				
	Foreground/background systems -Real time system concepts-				
	Resources-shared resources-Critical section- multitasking-Tasks-kernel-				

Scheduler-Round Robin-Non Pre-emptive and Pre-emptive scheduling-	
Context switch- re-entrancy- task priorities- Event flag-mutual exclusion-	
semaphores and types-Message mail box-Message Queues.

\* Examinations will be conducted for 100 marks and it will be reduced to 75 marks.

## RATIONALE

To impart practical knowledge to the diploma students, practical subjects are introduced for every corresponding theory subject. This practical supports the aim and objective of CIM.

## **OBJECTIVES:**

On completion of the following syllabus contents, the students must be able to

- Develop and test CNC program
- Simulate various part diagram
- Generate and execute the various CNC program

## 4047640 CNC PRACTICAL DETAILED SYLLABUS

Contents: Practical

## Name of the Topics:

## LIST OF EXPERIMENTS

### Introduction

- 1. Study of CNC Lathe, Milling
- 2. Study of international standards G-codes, M codes
- 3. Program writing Turning simulator Milling simulator, IS practice commands menus

## Exercise Practice CNC Lathe

- 1. Simulate and Produce a part for step turning.
- 2. Simulate and Produce a part for taper turning
- 3. Simulate and Produce a part for circular interpolation
- 4. Simulate and Produce a part for multiple turning operation
- 5. Simulate and Produce a part for thread cutting and grooving
- 6. Simulate and Produce a part for internal drills and boring

## **CNC Milling**

- 1. Simulate and Produce a part for grooving
- 2. Simulate and Produce a part for drilling
- 3. Simulate and Produce a part for mirroring with subroutine
- 4. Simulate and Produce a part for rectangular and circular pocketing

## SCHEME OF VALUATION

SI. No	Name of the Activity	Mark Allocation
1.	CNC PROGRAM	30
2.	SIMUALTION	20
3.	MACHINE SETTING AND OPERATION	30
4.	RESULT	10
5.	VIVA VOCE	10
	Total	100

## Equipment Requirements

SI. No	Name of the Equipments	Range / Specification	Required Quantity
1.	CNC Turning Machine	-	2 No's
2.	CNC Milling Machine	-	2 No's

#### **N-SCHEME**

### (Implemented from the Academic year 2020 - 2021 onwards)

Course Name : Diploma in Mechatronics Engineering / Electronics (Robotics) Engg

- Subject Code : 4047654
- Semester : V Semester

Subject Title : Process Control Practical

## **TEACHING AND SCHEME OF EXAMINATION**

No of weeks per semester: 16 weeks

	Instructions		Examination			
Subject	Hours /	Hours /	Marks			
ousjeer		Semester	Internal Assessment	Board Examinations	Total	Duration
Process Control Practical	5	80	25	100*	100	3 Hrs.

\* Examinations will be conducted for 100 marks and it will be reduced to 75 marks.

#### RATIONALE

This is the key subject in an Mechatronics Engineering. It is mandatory to study various control strategy being used in process industries. Various elements involved in controlling a plant such as controller, Final control elements are compact in detail in this practical subject.

## **OBJECTIVES**

On completion of the following syllabus contents, the students must be able to

- To get practice of controlling temperature in a single feedback loop
- To get practice of On-Off controlling of temperature, pressure, level of a process
- To get practice of Proportional control of Temperature process
- To get practice of Proportional-Integral control of pressure process

- To get practice of Proportional-Integral-Derivative control of level process
- To get practice of Proportional –Derivative of level process
- To get practice of Tuning of controller to achieve optimum control
- To understand the characteristics of control valve practically
- To get practice of working with P to I converter

## 4047654 PROCESS CONTROL PRACTICAL DETAILED SYLLABUS

Contents: Practical

## LIST OF EXPERIMENTS

- 1. Characteristics of different temperature sensors like
  - a. Thermocouple module,
  - b. RTD,
  - c. Thermistor Module
- 2. Measurement of Pressure using Strain Gauge type Transducer
- 3. Measurement of Pressure using Bourdon type Transducer
- 4. Level measurement by using Air purge method and Differential pressure transmitter
- 5. Experimentally implement On- off control of temperature process
- 6. Experimentally implement On off control of pressure process
- 7. Experimentally implement On off control of level process
- 8. Experimentally obtain the Characteristics of control valve
- 9. Measurement of displacement using LVDT
- 10. Conduct experiment to understand the Tuning of Controller
- 11. Conduct experiment to observe response of PI controller in a Pressure Process

- 12. Measurement of PID controller using Pressure controller trainer kit by monitoring the process in SCADA mode / InTouch software / analog mode
- 13. Conduct experiment to observe response of PD controller in a Liquid Level process
- 14. Experimentally obtain the characteristics of P to I converter

### EQUIPMENT REQUIREMENTS

SI. No	Name of the Equipments	Required Quantity
1.	ON-OFF LEVEL PROCESS	1
2.	ON-OFF PRESSURE PROCESS	1
3.	TEMPERATURE PROCESS	1
4.	LVDT TRAINER MODULE	1
5.	RTD TRAINER MODULE	1
6.	PID CONTROLLER	1
7.	THERMISTER TRAINER MODULE	1
8.	MOTORISED CONTROL VALVE SETUP WITH ACCESSORIES	1
9.	THERMO COUPLE KIT WITH ACCESSORIES	1

## SCHEME OF VALUATION

Total	100 Marks
VIVA VOCE	10 MARKS
RESULT	10 MARKS
READING AND GRAPH	20 MARKS
CONNECTIONS	30 MARKS
BLOCK/ CIRCUIT DIAGRAM	30 MARKS

## **RATIONALE:**

The introduction of this subject as an elective will enhance the knowledge of students in the field of automobile engineering and improve the placement opportunity in automotive sector. After undertaking this course ,the student develop skills to dismantle, test ,check ,fine tune and assemble the various components in an automobile

## **OBJECTIVES:**

At the end of the course the students will be able to

- To dismantle and test various components in Automobile
- To test and replace battery in Automobile
- To test the various sensors used in the Automobile

- To measure Engine parameters
- To assembly and test bike wiring harness circuit
- To assembly and test the E-Bicycle

## 4047655 AUTO ELECTRONICS PRACTICAL DETAILED SYLLABUS

## Contents: Practical

## List of Exercises

- 1. Testing the Battery: Hydrometer Test Open Circuit Voltage and High Rate Discharge Testing
- 2. Adjust the Beam of the Head Lamp
- 3. Adjust the Ignition Timing with Timing Light and Start the engine
- 4. Servicing and tune up of the Horn and Wiper Motor
- 5. Identification of various components of Ignition system
- 6. Removing, charging and replacing the Battery from a any vehicle
- 7. To test Engine crankshaft angular position senor & Engine speed sensor
- 8. Wiring and troubleshooting of Electrical accessories for any two wheeler
- 9. Test Brake actuation warning system
- 10. Wiring and troubleshooting the door lock indicators
- 11. Test Electronic fuel Ignition Systems for any vehicle
- 12. Wiring the E-Bicycle

## EQUIPMENT REQUIREMENTS

SI. No	Name of the Equipments	Required Quantity
1.	Lead acid battery	3 No's
2.	Hydrometer	3 No's
3.	Head lamp control board	1 No
4.	Horn and Wiper motor control board	1 No
5.	Ignition system control board	1 No
6.	Battery Charger	1 No
7.	Engine crankshaft angular position sensor	2 No's
8.	Speed sensor	2 No's
9.	Brake actuation warning system kit or board	1 No
10.	Car door with door lock indicators control board	1 No
11.	Electronic fuel Ignition Systems kit	1 No
12.	E – Bike cycle kit	1 No

## SCHEME OF VALUATION

CIRCUIT DIAGRAM / ASSEMBLY DIAGRAM	30 Marks
DISMANTLING / WIRING	30 Marks
IDENTIFICATION / TROUBLESHOOTING	20 Marks
RESULT	10 Marks
VIVA VOCE	10 Marks
TOTAL	100 Marks

## ANNEXURE – III STATE BOARD OF TECHNICAL EDUCATION &TRAINING, TAMILNADU DIPLOMA IN ENGINEERING / TECHNOLOGY SYLLABUS N-SCHEME

(To be Implemented for the students admitted from the year 2020 - 2021 onwards)

Course Name : 1040: Electronics and Communication Engineering

- Subject Code : 4040653
- Semester : VI
- Subject Title : Embedded Systems Practical

## **TEACHING AND SCHEME OF EXAMINATION**

No of weeks per semester: 16 weeks

Subject	Instructions		Examination			
	Hours /	Hours /	Marks			
	Week Semester	Internal Assessment	Board Examinations	Total	Duration	
Embedded Systems Practical	5	80	25	100*	100	3 Hrs.

\* Examination will be conducted for 100 marks and it will be reduced to 75 marks.

#### RATIONALE:

The introduction of this subject will enable the students to have hands on experience in using ARM Based trainer kit. The students are exposed to use the on chip peripherals using embedded C language. They can also get familiar with the use of ARM instruction set. They are learning the different methods for providing time delay and u se of serial communication. 32 bit ARM is a RISC processor which makes the students to expose to the new dimension in the field of embedded systems.

## **OBJECTIVES:**

The students are able to

- Understand the use of instruction set by writing simple ARM ALP and simulate to see output.
- Know the application details of on chip peripherals.
- Familiarize with the register map of on chip Timer / counter.
- Know the use of serial communication concepts using on chip UART0.
- Understand the use of GPIO and the connection of peripheral devices using these on chip GPIO programmable port Pins.
- Use the interrupts with the help of VIC.
- Get used with pin connect block registers for programming the GPIO port pins.
- Interface stepper motor and its operation.
- Understand the multiplexing of seven segment LED display device.

## 4040653 EMBEDDED SYSTEMS PRACTICAL

## **DETAILED SYLLABUS**

## Contents: Practical

## Exercises

1. Study of ARM Processor kit.(Example LPC 2148 kit)

2. Write assembly language program for addition, subtraction and multiplication and simulate.

3. Write and execute C program to blink the LEDs using software delay routine.

4. Write and execute C program to blink the LEDs using on chip TIMER// COUNTER for the delay(Using Polling method).

5. Write and execute C program to blink the LEDs using on chip TIMER// COUNTER for the delay(Using interrupt method).

6. Write and execute C program to read the switch and display in the LEDs.

7. Write and execute C program to count external interrupt pulses EINTx (using VIC) and Show the binary count value in LEDs.

8. Write and execute C program to display a number in seven segments LED.

9. Write and execute C program for serial transmission and reception using on chip UART. Send the received character back to the PC by Polling method.

10. Write and execute C program for serial transmission and reception using on chip UART. Send the received character back to the PC by Interrupt method.

11. Write and execute C program for accessing an internal ADC and display the binary output in LEDs.

12. Write and execute C program to generate square wave using on chip DAC.

## **BOARD EXAMINATION**

### Note:

- 1. Manual for the ARM instruction sets and manual for the trainer kit (Excluding sample program) can be allowed for their board exam.
- 2. Definition for built in function for the board can be given to students for their board function.
- 3. Manual containing procedure for program down loading through boot loader or JTAG can be given to students for their board exam.
- 4. Bit details of Registers of on chip peripheral devices can be given for the board practical examination.

#### DETAILED ALLOCATION OF MARKS

I.	Algorithm or Fl	ow chart	:	20 marks
II.	Program		:	30 marks
III.	Execution		:	30 marks
IV.	Result		:	10 marks
V.	Viva		:	10 marks
		TOTAL	:	100 marks

## LIST OF EQUIPMENTS

- 1. ARM7 TDMI KIT 15 numbers with interface boards for the above experiments .The chip set may be TMS4701,LPC2138,LPC2148 or STR7 etc.
- 2. Desktop computer / Laptop -15 Nos
- 3. Interfaces: Seven segment display. LEDS ,switches and stepper motor .
- 4. Manual for the trainer kit and Interfaces.
- 5. Manual for the built in function for the board.
- 6. Bit details of registers of on chip peripherals.

(To be implemented for the students admitted from the year 2020 - 2021 onwards)

Course Name	:	DIPLOMA IN ELECTRONICS (ROBOTICS) ENGG (1049) /
		MECHATRONICS ENGG (1047)
Subject Code	:	4047660
Semester	:	VI
Subject Title	:	Project Work and Internship

#### TEACHING AND SCHEME OF EXAMINATION

No of weeks per semester: 16 weeks

. .

Subject	Instructions		Examination			
	Hours	Hours /		Marks		
4047660 Project Work and Internship	/ Week	Semester	Internal Assessment	Board Examinations	Total	Duration
Internship	6	96	25	100*	100	3 Hrs.

\* Examinations will be conducted for 100 marks and it will be reduced to 75 marks for result.

RATIONALE: This subject 'Project Work and Internship" is the continuation of the previuos semester subjects. The students are to implement the detailed project plan, which they have prepared. This project are generally an integration of the various types of skills acquired during their course of study. Hence it is essential that students are given opportunity to develop and integrate the highly essential industry oriented competencies and skills. This subject build up greater confidence to face in the world of work.

#### **OBJECTIVES:**

• Implement the theoreticaland practical knowledge gained through the curriculuminto an application suitable for a real practicalworking environment preferablyin an industrial environment.

- Implement the planned activity as a team.
- Take appropriate decisions on collected information.
- Carryout cooperativelearning through synchronousguided discussionswithin theclassinkey dates, asynchronousdocumentsharing and discussions, as well as to prepare collaborative edition of the final project report.

### Project Work and Internship:

The students of all the Diploma Courses have to do a Project Work as part of the Curriculum and in partial fulfillment for the award of Diploma by the State Board of Technical Education and Training, Tamil Nadu. In order to encourage students to do worthwhile and innovative projects, every year prizes are awarded for the best three projects i.e. institution wise, region wise and state wise. The Project work must be reviewed twice in the same semester. The project work is approved during the V semester by the properly constituted committee with guidelines.

### a) Internal assessment mark for Project Work and Internship:

Total	 25 marks	
	theory subject pattern)	
Attendance	 <b>05 marks</b> (Award of marks same as	
Project Review II	 10 marks	
Project Review I	 10 marks	

Proper record should be maintained for the two Project Reviews and preserved for one semester after the publication of Board Exams results. It should be produced to the flying squad and the inspection team at the time of inspection/verification.

## b) Allocation of Marks for Project Work and Internship in Board Examinations:

Total	100* marks
Internship Report	20 marks
Viva Voce	30 marks
Report	25 marks
Demonstration/Presentation	25 marks

\*Examination will be conducted for 100 marks and will be converted to 75 marks.

### c) Internship Report:

The internship training for a period of two weeks shall be undergone by every candidate at the end of IV / V semester during vacation. The certificate shall be produced along with the internship report for evaluation. The evaluation of internship training shall be done along with final year "Project Work & Internship" for 20 marks. The internship shall be undertaken in any industry / Government or Private certified agencies which are in social sector / Govt. Skill Centres / Institutions / Schemes.

A neatly prepared PROJECT REPORT as per the format has to be submitted by individual student during the Project Work and Internship Board examination.

Hence it is essential that students are given opportunity to develop and integrate the highly essential industry oriented competencies and skills. This subject build up greater confidence to face in the world of work.

#### **OBJECTIVES:**

• Implement the theoretical and practical knowledge gained through the curriculum into an application suitable for a real practical working environment preferably in an industrial

environment.

- Implement the planned activity as a team.
- Take appropriate decisions on collected information.
- Carryout cooperative learning through synchronous guided discussions within the class in key dates, asynchronous document sharing and discussions, as well as to prepare collaborative edition of the final project report.

#### **Project Work:**

The students of all the Diploma Courses have to do a Project Work as part of the Curriculum and in partial fulfillment for the award of Diploma by the State Board of Technical Education and Training, Tamil Nadu. In order to encourage students to do worthwhile and innovative projects, every year prizes are awarded for the best three projects i.e. institution wise, region wise and state wise. The Project work must be reviewed twice in the same semester. The project work is approved during the V semester by the properly constituted committee with guidelines.

#### a) Internal assessment mark for Project Work:

<b>T</b> ( )	65 I
	theory subject pattern)
Attendance	 05 marks (Award of marks same as
Project Review II	 10 marks
Project Review I	 10 marks

Total ... 25 marks

Proper record should be maintained for the two Project Reviews and preserved for one semester after the publication of Board Exams results. It should be produced to the flying squad and the inspection team at the time of inspection/verification.

#### b) Allocation of Marks for Project Work and Internship in Board Examinations:

Total	100* marks
Viva Voce	30 marks
Project Report	30 marks
Demonstration / Presentation	40 marks

neatly prepared PROJECT REPORT as per the format has to be submitted by individual student during the Project Work Board examination.

## SANDWICH DIPLOMA COURSE-INDUSTRIAL TRAINING

**4047480** Industrial Training I (Report writing & Viva Voce)

**4047720** Industrial Training II (Report writing & Viva Voce)

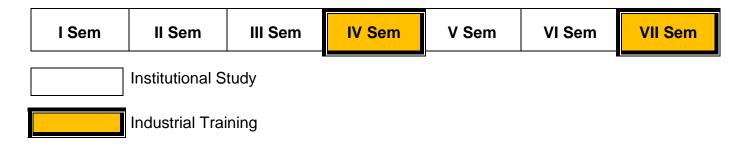

#### 1. Introduction

The main objective of the sandwich Diploma course is to mould a well rounded technician acclimated with industrial environment while being a student in the institution.

The Sandwich Diploma Course study is pursued by students, in 7 Semesters of 3 ½ years duration, the subjects of 3 years-Full Time Diploma Course being regrouped for academic convenience.

While in the 4th semester students under Industrial Training for 6 months(December through May). They also do course work in the institution for one day in a week, While in the 7<sup>th</sup> semester they undergo another spell of 6 months (June through November) Industrial training.

The Apprenticeship (Amendment) Act 1973 is followed in regulating the Industrial training procedure for Sandwich Course.

#### 2. Attendance Certification

Every month students have to get their attendance certified by industrial supervisor in the prescribed form supplied to them. Students have also to put their signature on the form and

submit it to the institution supervisor. Regularity in attendance and submission of report will be duly considered while awarding the Internal Assessment mark.

### 3. Training Reports

The students have to prepare two types of reports:

- Weekly report in the form of diary to be submitted to the concerned staff in-charge of the institution. This will be reviewed while awarding Internal Assessment marks.
- Comprehensive report at the end of each spell which will be used for Board Examination.

#### 3.1 Industrial Training Diary

Students are required to maintain the record of day-to-day work done. Such record is called Industrial training Diary. Students have to write this report regularly. All days for the week should be accounted for clearly giving attendance particulars (Presence, absence, Leave, Holidays etc). The concern Industrial supervisor is to check periodically these progress reports.

#### 3.2 Comprehensive Training Report

In addition to the diary, students are required to submit a comprehensive report on training with details of the organisation where the training was undergone after attestation by the supervisors. The comprehensive report should be incorporating study of plant / product / process / construction along with intensive in-depth study on any one of the topics such as processes, methods, tooling, construction and equipment, highlighting aspects of quality, productivity and system. The comprehensive report should be incorporated with the last week of Industrial training. Any data, drawings etc should be incorporated with the consent of the Organisation.
